Pretty presumptuous of you. I've been fortunate enough (and presumably
smart enough) to have had a very successful life , thank you very much.
(and probably more successful than you by any measure you care to
choose, so I suggest that you be careful before you start down that road).

> It is amazing to see liberals and Democrats become hawks on the war on
> terror at the snap of a commercial port issue.

As to becoming a "hawk on the war on terror", that has nothing to do
with it. It has to do with the Administration being s-t-u-p-i-d and
greedy corporate whores. Why do they want to get in bed with one of only
three countries that diplomatically recognized the Taliban? A country
that was home to two of the 9/11 terrorists? A little hypocritical on
their part, don't you think? Why is there such a firestorm and
bi-partisan outcry? Are you saying Frist and a lot of other Repubs
against the UAE deal are "liberals" and "Democrats"?

They "know full well"? Hardly. They are now saying Bush didn't know
anything at all about it until a day or two ago, and yet the shrub
said he was going to defend it to the hilt with his veto powers (even
though he didn't know anything about it? That sounds a bit fishy).

Great--we have Sargent Schultz (of 'Hogan's Hero's' fame) for a
president: "I know nossing, I see nossing".

His tenuous conclusions are wrong. He is selective in his thoughts
expressed. You can make anything or deal look stupid by citing only the
downside or negatives and leaving out other data.

Also his facts lead to suppositions that the port deal is "stupid." This
mode of thinking just causes you to move further out on a limb. Now I
hope you and others don't prove to be ideologues and keep arguing a
bogus points on the issue.

< Snip >

I am not presumptuous. I responded to what you wrote not unknowns. Pay attention to what I wrote, which is not to dispute your "facts." If you can't figure out my response of just a few lines of text then you expect to have a dialogue? How presumptuous of you to think that. You made the same error in your reply by quoting just one line I wrote, which of course makes it out of context and nonspecific to my previous response, which again is you being selective in your thinking and "facts."

Face the fact that you and I do not know as much about this commercial port shipping lease deal as president Bush and his cabinet.

What I want to know is what is your point in posting just a few negative facts on an important off topic issue and coming to a non-proven conclusion that half the people reading it are not going to agree with and then move on to a conclusion not worthy of bashing president Bush?

This is not a of topic post but a TROLL post just designed to get people riled up. Here is a tip, irritating people are not welcomed by anyone anytime anyplace.

Looks like they're just taking a page from the Republican's attack
tactics book.

If you think of is as Arab investors buying yet another British firm,
it's no big deal to a globalist. But the Shrub waked right into the
right wing isolationist/nationalist buzz saw. (All those folks worried
about outsourcing and illegals crossing the border and loss of economic
control). It shows that he isn't paying attention and cares more about
his long term business connections than what worries some of the American
people. And this bit with the macho veto threat, he looks like some
Arab's boy toy.

Source record: 64281

>So why didn't Icom do a better job of making the R75 in the first place??? <

That, my friend, is the $64,000 question. There are some who have been hounding ICOM to upgrade new units to be more effective based on both better corporate design and what others have done; some have also been insisting that ICOM accept the earlier models back and "fix" them - but if there is no fix yet, how can ICOM do this?

In any case, the complaints seem to have fallen on deaf ears - for now. In any case, my impression of the modded R75 is that (1) the synch detector itself still needs work 9my personal opinion is that ICOM owes its customers a free or cheap retrofit to fully realize this ability, since their original advertising was tantamount to a flat-out lie); (2) the AF DNR isn't perfect, but nonetheless better than nothing; and (3) the NB isn't quite effective enough for some types of impulse noise (although it works not badly at all). Otherwise, the radio is a gem. The AGC is now great and effective, SSB reception is fabulous, AM now sounds sweet and nice with a cheap external speaker, sensitivity is A-1, selectivity is about as good as you'll get with the Kiwa filters short of much more expensive and complex installation, ANR het reduction is good to excellent, and the radio is tremendously versatile. In my own location, I am limited only by my antennas, nearby urban RF crud and the proximity of 3 nearby 50kW blowtorch stations that splatter badly. Otherwise, I don't think I would have trouble hearing Pluto at 100mW. On the whole, I think the radio a great value.

Source record: 64283

You could get a big ferrite rod from a supplier or off EBay, wrap several dozen antenna windings around it, and then place it next to and hopefully parallel to the ferrite inside your old radio. Ground one end of the wire, and string out the other end of your wire as you wish. Coupling effects should increase your reception. This would be cheap and noninvasive, and portable too.

If you can open the radio up, you could even place the new wrapped rod next to the old one (making sure that there is no direct conductive effect) and try that. If you do this, watch out, though - if too close, the stronger signal may overload your inexpensive rig.

Otherwise, wrapping insulated wire around your existing ferrite core and stretching the remainder around your apartment might work just fine.

That song's out of South Los Angeles (aka South Central)

"The Wallflower" (also known as "Dance with Me, Henry") is a popular
song.

It was written by Johnny Otis, Hank Ballard, and Etta James. James
recorded the original version, but the biggest selling version of the
song was a cover version recorded by Georgia Gibbs, charting in
1955.'' (wikipedia)

Not ''Tin Pan Alley''

Don't believe they actually get any 'tax' money from the sale of booze, however they still are the recipients of financial benefits from certain brands of British/Scotch booze imported into the USA.

I vote for the second idea using the existing core with another winding.
The purpose of the core is to increase the inductance per turn. This is
accomplished by concentrating the magnetic field of the coil and as such
will make it harder to magnetically couple between two coils with cores.

You could make an air coil tape it on the outside of the case near the
internal antenna coil inside the case.

This is messy but you could wrap the wire around the outside the radio
case so it's coupled to the internal core with the antenna one one end
and ground on the other.

Patently WRONG! You're original response to my original post was three (3) lines total. I quoted *each* of those three lines in their *entirety*, albeit with a response between each line. Please check more carefully before you make false accusations.

> Face the fact that you and I do not know as much about this
> commercial port shipping lease deal as president Bush and his
> cabinet.

You keep harking back to a "commercial deal". *I* am pointing out the hypocrisy of them getting in bed with a country that is apparently quite soft on the "war on terrorism", which is, ironically, the perpetual mantra of this administration.

To state the obvious, these ports are gateways into our country and many Republicans from Frist on down are "riled up" and highly concerned about this issue. (which, BTW, you also dodged, implying that only "liberals" and "Democrats" thought it's a bad idea). Plus I don't see you bitching about all the OT "top 10" movie posts...too bad you're complaining about an issue that's a bit more vital to our nation.

4055. Re: Ten Tec R350D - Is it worth $1200

Newsgroup: rec.radio.shortwave
Date: 2006-02-23 20:33:57 UTC
From: Byung Myung Sying <pying@fong.com>
Message-ID: <is5sv11pag9ik2rrvufd5rufrc3jhearbp@4ax.com>
Source record: 64406

I have an RX-350 (not the "D" model which simply added a 12 kHz output jack on the back for DRM reception). I modified my RX-350 slightly to add the 12 kHz output jack to the back of mine.

I have had this receiver for more than two years now and I really think that it's a fine unit. The ability to easily connect it up for DRM use was the original reason I bought it and it performs very well for DRM use. I regularly listen to Radio Luxembourg during the early morning hours using the DREAM free DRM software receiver running on my computer.

As far as being a good shortwave reciever, I think that it's very good. Although the Synchronous Detection on it is pretty useless (it loses lock at the drop of a hat), it does extremely well receiving AM (shortwave broadcasts) in SSB mode (ECSS). Since the bandwidth and PBT controls are functional in SSB mode, I simply tune shortwave broadcast stations in SSB mode, selecting the upper or lower sideband, whichever gives me less interference. The tuning is rock stable (it doesn't drift at ALL) so stations tuned in SSB mode are rock stable. Since I can choose the 8 kHz bandwidth in SSB mode, I can listen to shortwave broadcast stations in high-fidelity without any fade distortion, eliminating any interfering stations by selecting the opposite sideband.

I live about a block away from the transmitting sites of 5 FM radio stations and about a mile away from a couple of 50 kW AM radio stations. The RX-350 has never been bothered by these stations.

As far as receiving ham and utility stations, since the bandwidth is infinetely adjustable, it does a fine job of cutting QRM/QRN and allowing rock-stable reception without any drift.

The passband tuning is very effective and operates similarly to the Drake 4245 (a commercial version of the R-7A) that I also own. The noise reduction circuit is quite effective.

In fact, when it comes down to it, when I have the choice of listening to my Drake/Sherwood SE-3 synchronous detector combo and the RX-350, I usually use the RX-350 since it pretty much always out-performs it in terms of fidelity and in terms of adjacent station selectivity.

I do have a SLIGHT problem with my RX-350 in terms of the display. After a couple of hours of use, the display darkens and "smears" somewhat. It doesn't hurt the receiver at all, and the display still works, but I'd make damned sure that TenTec has fixed the problem on the receiver that you buy. Get a WRITTEN warranty against this

problem.

I've heard that TenTec service is lousy and that they don't care at all about their customers. They haven't updated the firmware for the RX-350 is several years, despite their advertisments to the contrary on their website. Thus, reviews of this reciever have been mixed since apparently there's quite a bit of "sample diversity" depending on which receiver you happen to get.

If you have any other questions, don't hesitate to ask....

Ok, but JPS has had an auto notch filter on the market for nearly 15 years or so that works to perfection on multiple hets, the NF-60! The anf on the R75 is pathetic in comparison. When listening to SSB it makes a great deal of difference. It just seems that it would have been sooooo simple for Icom to have made the R75 a much better radio, and for nearly the same price. Don't get me wrong, I believe the R75 is an excellent value for the money, even the stock radio.

Ah yes, Pulp fiction is a wonderful movie. I also like The silence of the Lamb movie. My tastes run towards the Violent & Bizarre. Buckaroo Banzi, Leaving Las Vegas, and that Strange Burroughs movie The Naked Lunch are all good. Saw and Hostel I haven't seen but look forward too.

I only own three movies. The shining, A Clockwork Orange and Pulp Fiction.

When everyone has had a chance to chime in then it might be a good time to make a top 100 movie of all time list. I never know what to rent at the video store.

Just say NEO!

regards,
Bob

If you're going to the trouble of opening up the case, why not connect
directly to the antenna cicuitry though a suitable DC block?

Subject: Press Release regarding the Cheney Incident.....

02/16/06 PM
Press Release
The Texas Parks and Wildlife Department has issued a statement today stating that Vice President Dick Cheney broke no law by shooting a lawyer instead of a quail this past weekend. A TPWD spokesman noted that, in Texas, lawyers are not considered game animals, and, therefore, not subject to seasonal limitations and/or bag limits. It was further noted that lawyer hunting actually was encouraged since the state is overrun with these worthless, despicable pests. A local food critic added that, contrary to various rumors and opinions, lawyers do not taste like chicken!

Hmmm, I usually avoid off-topic posts... But this one, well...okay...

I can never narrow down to a list of just ten. But I can name my all
time favorite movie...

Werner Herzog's 1972 film Aguirre.

http://www.imdb.com/title/tt0068182/

Excellent movie. Even more interesting are the actual historical
events upon which this movie is roughly based.

Bush: No need to worry about port security

WASHINGTON (CNN) -- President Bush on Thursday defended his administration's decision to allow a company from an Arab country to operate six major U.S. ports, saying, "People don't need to worry about security."

Do you believe the Bush administration puts commercial interest ahead of the national interest as a matter of general policy?

Aahh ah ahahahaaa, aahh ah ahahahaaa
What will you do if we let you go home,
And the plasticï¿½s all melted,
And so is the chrome?
Who are the brain police?

Aahh ah ahahahaaa, aahh ah ahahahaaa
What will you do when the label comes off,
And the plasticï¿½s all melted,
And the chrome is too soft?

Aaahhh!

Think Iï¿½m very tired and Iï¿½m going to die
I think Iï¿½m going to die, I think Iï¿½m going to die
Who are the brain police?

Aahh ah ahahahaaa, aahh ah ahahahaaa
What will you do if the people you knew
Were the plastic that melted,

And the chromium too?
Who are the brain police?

-=jd=-, where are you when we need you?

In many of your previous posts, you told us things were looking up in Iraq and would get even better after the elections. Those words gave us comfort.

However, time has gone by...

...and the elections have come and gone.

Unfortunately...

...American kids are *still* dying

...American kids are *still* getting mutilated

...innocent Iraqi civilians are still dying

...still electricity shortages

...still fuel shortages

...bombings almost daily

...with the recent bombing of the Shia mosque, Iraq is truly teetering on the brink of civil war, closer to it than they ever have been.

Please come back, tell us again how things are getting better and bring us more words of comfort.

Oh,...what's that you say?

Things aren't better?

You were wrong?

Sorry, excuse the ring.

www.google.com Increase your AM Radio reception with an additional ferrite antenna.

About four years ago when I was listening to Roger Fredinburg's radio talk www.regularguy.com show,he said to try wrapping your telephone cord around your radio and see if that will improve your radio's reception.I tried that and it didn't seem to help much.Maybe it depends on the radio.

You can't blame the latest crapola going on over in Iraq on the left wingers this time. What happened to the democratic process in Iraq. The Shias and Sunnis are now going at each other's throats. It looks like the whole mess is getting worse. Next a civil war? Is that what our democracy building process was all about?

Kash-for-Kofi

Despite frequent declarations of reform, it seems that United Nations Secretary-General Kofi Annan has learned nothing from the U.N.'s Oil-for-Food scandal, in which Saddam Hussein's billions corrupted the U.N.'s entire Iraq embargo bureaucracy. Earlier this month, Annan accepted from the ruler of Dubai an environmental prize of $500,000--a fat sum that represents the latest in a long series of glaring conflicts of interest.
...
The real issue is why on earth Kofi Annan thinks it a good idea while serving as secretary-general to accept $500,000--for any reason--from a high-ranking official of a U.N. member state. Sheikh Mohammed is not only the ruler of Dubai but the vice president and prime minister of the United Arab Emirates. No doubt he bestowed this award as a gesture of appreciation. But if the other 190 U.N. member states were to follow his lead, Annan would be rolling in $95 million worth of personal prize money. Once the secretary-general allows himself to become a collector of cash awards, where's the line to be drawn? If Syria were to offer him a $10 million environmental prize, or China were to up the ante to $100 million, should he grab a suitcase and go pick it up?
...
http://www.weeklystandard.com/Content/Public/Articles/000/000/006/781gawip.asp

Another "small item" that flew under the left-wing media's kookoo nest.

> When everyone has had a chance to chime in then it might be a good time
> to make a top 100 movie of all time list. I never know what to rent at
> the video store.

I have seen so many movies that I like (and multitudes that I don't) that I really have a hard time narrowing it down to my absolute faves. I guess I'll go with movies whose memories have stuck with me for a long time. These are not in any kind of order-- just off the top of my head:

The General (the old Buster Keaton silent)
The Sea Inside (Spain)
Pulp Fiction
Monty Python and the Holy Grail
Schindler's List
Secrets and Lies
Gladiator
Casablanca
One Flew Over the Cuckoo's Nest
Central Station (Brazil)

I do have two particular favorites on this list, and both have to do with the amazing performances of their lead actors.

"The Sea Inside" is one of the best movies I've seen in a very, very long time. It's a Spanish film, so if you don't mind subtitles or if you can understand Spanish, it's absolutely well worth renting. The lead performance by Javier Bardem as Ramon Sampedro is one of the best jobs I've ever seen an actor do in any role, in any movie, ever. He was nominated for a Best Actor Oscar, and the movie itself won Best Foreign Film in 2004. Even my foreign-movie-shy friends loved it.

The other is Brenda Blethyn's performance as Cynthia Purley in "Secrets and Lies." She was astounding. She was also nominated for an Oscar for Best Actress in 1996 and should've won it.

Puh-leze!

If you are going to quote, do it in context.

1) My post (in general) was about the *firestorm* Bunnypants created with the "port" issue, as reported by *ALL* media, including Fox and the Wall Street Journal--unless you are calling them, Hastert, Frist and all media "left-wing" (which, presumably, would then make you somewhat to the right of Attila the Hun). :-)

2) The quote above (in specific) referred to Bunnypants claiming and almost disavowing any and all knowledge of the issue (a la Sgt. Schultz). It was a pretty weak attempt to back peddle on his part--the perfect Sgt. Schultz-ism.

Context.

Got it now?

It's a commercial deal to transfer cargo from ship to shore. That's it.
What else is there to understand about it? This does not affect homeland
security, the port authority, the coast guard or inspection of goods in
any way.

The UAE is an ally not an enemy nation and they support the war on
terror. What is your problem with that? You want to punish our allies?
You are not prejudiced against arabs are you?

> To state the obvious, these ports are gateways into our country and many

Everybody understands the security issue. You came out bashing Bush for
leading the country in a necessary direction and being completely
insulting about it. Your original insulting and ignorant post reiterated
the speech espoused by several clueless liberal Democrats therefor that
description of your post is accurate. Your original post was designed to

get a rise out of people like myself that read the news group. Pretty nasty of you.

Why don't you go post crap about president Bush in a news group where it is wanted. Have fun.

Those two Brits with the makeup and bombs must have finished what they started. A civil war is EXACTLY what the occupation forces want. A three way split of the country has been desired by Israel for years and what Israel wants, England and the US DO.

Yes, for sure. Let me see... two of the 9/11 terroritsts were from UAE, just like the rest of them were from Saudi Arabia, yet the administration flew the Royal Saudi Family home right after 9/11 (when no other flights were allowed). Also, UAE is letting us use their ports for our navy ships... can you smell a deal that is already done? Looks to me like we're being Bushwacked yet again. I've heard all the pros and cons on this issue, even from Republican Senator McCain who I respect highly and is in support of this, and I really don't see the security risk from this transaction (outside of their employees getting passports easily), but it still smells like a payback to UAE to me... and I'm sick of being lied to. Think about this... - Bushy has not vetoed anything, yet he threatens to veto any congressional action on this? That stinks of pure shit, which is what Bush has given us.

Attila and the boys predate the French Revolution by a year or two. I'd
think the terms 'right' or 'left' wing wouldn't apply in this case.

Unfortunately, I don't have the money to do so at this time. Somebody reminded me that the last time I had it in for service, Yaesu kept it for several months, and I had to keep calling them to get them to repair it. The problem was a blown resistor-a resistor that was a common problem on 8800's. I may not even fix it. Yaesu rigs don't seem to be very high quality, at least not the HF receivers. I can get an older Icom off Ebay for $3-400, and I may go that route. I searched for "Icom receiver" and turned up 36 matches, of which only a couple were radio mart offerings.

Why not, the bushies seem to do it all the time...
http://news.yahoo.com/s/ap/20060224/ap_on_go_pr_wh/ports_security_katrina
Please note the last paragraph:

The United Arab Emirates has long-standing ties to the Bush family.
Records show the UAE and one of its sheikhs contributed at least $1
million before 1995 to the Bush Library Foundation, which established
the
George Bush Presidential Library in College Station, Texas. The
executive chairman of Dubai Ports World, Ahmed bin Sulayem, is not
listed among donors.

But of course, it's only the left who cannot see the truth...

I also loved The Sea Inside. you can find my comments on Offoffoff.com. I would also recommend some of my favorite movies: Insomnia, with Al Pacino; Phantom of the Paradise, with Paul Williams; The Sweet Hereafter, based on the book by Russell Banks; The Man Who Fell to Earth (David Bowie), and A Beautiful Mind, about John Nash, the mathematician. These are among my favorites; some are quite old and considered cults. A good scary movie (and it takes a lot to scare me is The Changeling (also older); can't remember the star's name. And Dogville, with Nicole Kidman, is incredible.

I never,never pay any attention at all to movie ratings or those Phoney oscars.What determines for me about whether any movie or movies I myself watch is do I myself like whichever movies or not.siskel and ebert uses to be on tv years ago on Sunday evenings.Nine times out of Ten,I myself Completly Disagreed on their so called "expert" movie opinions.Sheesh,what a bunch of Dorks they are! It's this way with me myself,if I like a movie,I myself like the movie.I dont need any Stinking Dorks to try to make up my mind for me whether a movie is good or not.I do my own movie ratings.y'all can agree or disagree,but that is my Opinion.
Tremors II: Aftershocks movie is starting on tv right now,,,, I give the movie a Perfect Ten Rating.

I don't believe we should be outsourcing any of our jobs.. let alone ones
that are located right on our own shores.. I don't care if it's to the UAE,
the UK, Australia or a village somewhere in the Himalayas.. and ESPECIALLY

not a security sensitive thing like running our ports.

Hi all
I have managed to find myself a Sony SW77, I got it off ebay, it works 100%
and is near mint, boxed with all that came when new.
I read so much about these, I just had to have one, I will pick it up on
Sunday
Anyway, has anyone here got or had one of these, can you tell me what they
are like.
I use a Icom R72, how will the SW77 compare against this for use as a
portable
Is it good for SSB use etc
thanks for any advice
cheers
Rikk

Oh, snappy comeback. You poked your nose into this discussion! NOT
THE OTHER WAY AROUND. Then go crying foul! What an asshole you are.

Next time your throw your 2-cents into a conversation, that you have no
idea what its about, OR WHAT IT INVOLVES, try to recall how well it was
accepted in this one. You do have a real steep learning curve, so it
probably won't sink in for a long time, but give your keyboard
obsession a rest and try real hard.

Let me reiterate, GO FUCK YOURSELF BUCKO!

Not a bad list, but purposely avoids both silent films and non-English films - both of these categories have many titles that have earned the right to at least be considered.

For those who might be interested in checking out silent films, and the amazing wealth of entertainment (and historic) value they contain, this link and list would be a fine starting place - it is not a critical list but rather a popular one, although a list by critics in this case may not look much different.

http://www.silentera.com/info/top100.html

This list has only films that still exist, and which can be fairly readily obtained for viewing on DVD or VHS. In most cases, these films are presented in excellent quality prints, some from original camera negatives, and most with good-to-excellent musical scores. Highly recommended.

>All crimes have some hate to them. <

I beg to differ - some crimes are just matters of convenience, insouciance or stupidity...even some with victims (a death by drunk driving is not appreciably the result of hate, but it still involves a victim). I personally know some illegal gamblers who wouldn't hurt a fly.

And perhaps, some things that are illegal, should not be so.

Nice set. Sensitive. Good sync detector. Drawbacks lay primarily in the chuffing that accompanies tuning wheel/disc use and the horrible FM reception.

Some folks don't find this size particularly portable; I guess b/c we've become so accustomed to more compact portable sets. But such compact sets don't offer the performance of an SW77.

Sure, it'll be more portable than your R72. And it's good on batteries/cells. While not ideal for SSB reception, it's certainly one of the better portables for such applications (50 Hz tuning increments).

There're loads of threads about the SW77 in the rec.radio.shortwave archives:

http://groups.google.com/group/rec.radio.shortwave/search?group=rec.radio.shortwave&q=SW77&qt_g=1&searchnow=Search+this+group

You can see here where someone compared their SW77 against the R75:

http://groups.google.com/group/rec.radio.shortwave/browse_thread/thread/f4d9108385428e44/7a7b2ac931ddd57a?q=SW77&rnum=1#7a7b2ac931ddd57a

Anyway, loads of info on the archives. Do check it out.

This is hilarious. Reich Wingers, who have spent the past 4 years
cultivating anti-Arab sentiments, are now accusing people who object
to the selling-off of America to the highest amoral bidder
''racists''.

Dig it: The UAE is a criminal enclave. Their race has nothing to do
with it.

>Gambling is a vice. Not a ''crime'' in my strict sense of the word, which to me means an antisocial act.<

Your definition may be at variance with Webster's and your local, state and federal statutes, however. A crime is what the law defines it to be, which could be merely a perceived breach of morality or ethics.

Even the theft of valuables does not necessarily involve hate; irresponsibility and dishonesty, sure, but greed is all the motivator one needs for that.

OTOH, there are many acts that give the impression of hate through violence of some kind, which are not crimes at all.

Bruce Jensen

BBC TO SCRAP RADIO LINK AFTER 62 YEARS
Owen Gibson, Friday February 24, 2006, The Guardian

Calling the Falklands, the twice-weekly BBC World Service programme
that became a lifeline for the islands during the 1982 war, is being
axed after 62 years.

The corporation plans to announce today that in an age of satellite TV
and the internet there is no need for a dedicated programme bringing
news and personal messages from Britain to the remote Atlantic
islands.

Instead the BBC has agreed on a package of measures to support the
islanders' local radio service, including the supply of World Service
content and a two-year subscription to syndicated commercial
programming.

http://media.guardian.co.uk/radio/story/0,,1716725,00.html
(via Mike Barraclough, DXLD)

Registration required. Does the story give any hint of when the last broadcast
will be? Could even be today Feb 24, or Feb 28, scheduled Tuesdays & Fridays
only 2130-2145 on 11680, masked here by BBC French Guiana 11675

4180. Propagation

Newsgroup: rec.radio.shortwave
Date: 2006-02-24 17:20:31 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <43FF405F.D7231E42@milestones.com>
Source record: 64732

SEATTLE, WA, Feb 24,
2006--More zeroes! A string of
zero-sunspot days reappeared
this week--a pattern we'll likely
see repeated over the next year,
but for longer periods. Average
daily sunspot numbers
compared to last week dropped
by nearly two points to 7.1. On
February 20 and 21 a gust of
solar wind hit Earth, causing a
moderate rise in geomagnetic
indices and visible aurora way
up north (see photo). A small
coronal hole on our sun's
equator was the source.

Over the next week don't expect sunspot numbers to rise. You can
take a look at recent Daily Solar Data numbers, updated daily, on
the Space Environment Center Web site, which also includes a
rundown of geomagnetic indicators. A solar wind from a coronal
hole is expected to cause unsettled conditions for Friday and
Saturday, February 24-25. Geophysical Institute Prague expects
unsettled conditions for February 24, quiet to unsettled on
February 25, quiet February 26-27, and quiet to unsettled on
February 28-March 2.

We receive a steady stream of mail inquiring about the magnitude of the next
solar cycle and the
end of this one. Steve Stutman, KL7JT/1, in the Boston area said he'd heard that
the rise of the
next solar cycle should be modest. I poked around, and found an interesting link
for solar cycle
24. With 23 recorded sunspot cycles, there isn't a huge amount of data to
analyze, so as you
can see on this site, various approaches are put forth that the users believe
have worked in the
past. I think most of us would prefer Hathaway's prediction, which is the first
one listed under
"Predictions of Cycle 24." We would prefer it, because it is the most
optimistic.

Don't miss this graphical presentation on the SEC site of data from the current
Cycle 23, as well
as a nice visualization of all recorded solar cycles on the WM7D site. You can

see from these
graphs why Cycle 19 in the late 1950s is recalled with such fondness. I became interested in
ham radio as a young boy in 1963, got my license in 1965, and not only was solar activity low
during the mid-1960s, but Cycle 20, which peaked in the late 1960s, was a real stinker in
comparison to the recent one. Of course all of the older hams--just about everyone, since I was
12 at the time--had experienced Cycle 19, and I hadn't.

My only recollection of Cycle 19 was as a small boy in Reedley, California. My father, a
biologist, was taking a few years off to earn money for school selling insecticide to farmers
before returning to Berkeley for his PhD. My dad had a company car, with a long whip antenna
on the back connected to a low-VHF business-band FM two-way radio (probably 30-40 MHz). I
recall his talking about being unable to raise the head office in Fresno, but someone in Texas
was able to relay for him, and something about sunspots. Around that time hams were living it
up on 10-meter AM, working the world with low power.

We don't have many sunspots now, so the MUF (maximum usable frequency) tends to stay low.
But we do have quiet conditions, and the CQ 160-Meter SSB contest this weekend isn't
bothered by low MUF.

Finally, Cap Cox, W4AMW, of Owensboro, Kentucky, writes about the CW portion of the ARRL
International DX Contest, which took place last weekend, and about conditions in general:

"Saturday morning around 1000-1200Z I worked Japan, Russia, Western Europe and could
hear VT and CO all about the same time on 40 meters. That night I worked Japan and
Switzerland on 80. Sunday during the day 20 was open into Europe and Africa all day and even
10 meters lit up into Central and South America in the early afternoon. I'm running a hundred
watts into a Windom. I kept looking at my calendar to make sure it wasn't 2013 already. Wow!

"I guess it helps to have a couple of thousand operators on all the HF frequencies pushing the
ethereal envelope in order to know what conditions are really like under the circumstances. I can
get by with 'poor' bottom of the cycle conditions like these for a long time,

maybe even until the
next 'peak' arrives."

For more information concerning propagation and an explanation of the numbers used in this
bulletin see the ARRL Technical Information Service Propagation page. An archive of past
bulletins is on the ARRL Web site.

Sunspot numbers for February 16 through 22 were 27, 23, 0, 0, 0, 0 and 0, with a mean of 7.1.
10.7 cm flux was 79.2, 79.2, 78.5, 76.5, 76.2, 75.9, and 76, with a mean of 77.4. Estimated
planetary A indices were 8, 4, 2, 6, 20, 17 and 12, with a mean of 9.9. Estimated mid-latitude A
indices were 7, 2, 2, 5, 9, 15 and 11, with a mean of 7.3.

To actually put some shortwave content in this thread, there was a great
"Background Briefing" on this subject on Radio Australia (ABC Radio
National) a few months back. I don't know if audio is available, but
there should be a transcript. Search for "Macquarie Bank" (sp?) and
"Infrastructure" on www.abc.net.au/rn . They covered the California
toll road stuff pretty well.

I read somewhere else that all the telephone poles in Phoenix are owned
by an infrastructure trust. There are some pretty strange ways that
these finance guys plan to make money. Because if the utilities were
anywhere near competent at running the facilities before this, the only
way it'll pay off is by dropping the quality of service to the level
just above where things totally break down. Then if there's a disaster,
they'll go bankrupt, leaving the area served with NOTHING.

>Stealing involves hate. It shows a profound lack of respect for the person you stole from. <

I disagree. Respectfully. Hate and disrespect are two diferent things, just like love and respect are two different things. It is possible to hate someone, and yet have respect, even admiration, for certain aspects of his character.

>There are no morals. That's a bullshit concept.<

I disagree. To the degree people adopt them, there are morals and ethics. I have both, and my past posts are evidence of them (whether you agree with them or not). If there were no morals or ethics, *you* would not feel compelled to charge this newsgroup with all sorts of unrelated controversial topics...you wouldn't give a damn and would consider them a waste of your time. Not that I am concerned - it's just a newsgroup - but your posts are evidence of a strong morality and sense of ethics. In other words, a sense of right and wrong.

That's probably not true. Bush stated that he learned about the port
deal from the media a couple of days before the fuss really got going.
Where as, us regular listeners to the BBC's World Business Report had
been hearing regular stories about the takeover bidding war between Dubai
and somebody else (Singapore?) for P&O (the company at the top of deal)
for several weeks.

face,in the neck,in the arm.
cuhulin <

Eisenhower was a significantly different character than Cheney (which
is what I think you refer to). Politics aside (and this is hardly a
political matter anyway), I believe he was (outwardly) less emotional,
less inclined to be off-the-cuff, and imminently more sensible. Each
of these traits would probably lead a person to be less accident-prone.
One can bring up the example of Gerald Ford ;-), but I believe that
clumsiness is not specific to character.

When you disrespect others you are hating yourself.

Morals are lessons. Ethics are pragmatic behaviors.

Survival of the species depends on everyone helping everyone.

>When you disrespect others you are hating yourself. <

That's just weird. I don't get the logic of this. My disrespect for, say, a pathetic politician or a rapist certainly does not indicate self-hatred.

>Morals are lessons. Ethics are pragmatic behaviors. <

Narrow, incomplete definitions.

>Survival of the species depends on everyone helping everyone. <

That's all well and good - if not absolutely true - but this, in itself, shows both morality and a sense of ethics.

That's more of an emotional reaction than a failure to identify.

Bad people reflect something in all of us that most of us keep under
control.

Hate and love are the same thing.

Well, seeing as you brought it up, on a similar note, it was announced yesterday by the association of food banks (e.g. "Gleaners" and their ilk), that their five year survey shows that their "business" is up (more people requiring food assistance) by 9% compared to the year 2000 survey.

Is this another "heckuva job" that we can add to Bunnypants' "Doing a Great Job" list, that 9% more of our populace is hungrier than they were 5 years ago???

>>> Hate and love are the same thing.<

>>*Surrrrre* they are...

>They are both self-destructive extreme emotional reactions to another person. <

For you, maybe. Not for everyone. Love can also mean feeling that something or someone is worth exalting or amplifying, hate can mean that something is worth ending or eliminating. Each can be fulfilled without self-destruction. The love I share with my family is one of the most wonderful, joyous, and nourishing aspects of my life...I see nothing self-destructive about it. The emotions themselves can be aimed at nonhuman things, too...a place you love or a condition that you feel must be changed, both constitute expressions of these emotions. Moreover, they are also diametrically opposite in meaning (I can't believe that I had to say *that* to an intelligent person), blowing your theory out of the water.

I feel sorry for you if your life has led you to these conclusions. Whether they come from hard experience or a weird psychoanalytical perspective, I hope you can find a way to soften your attitudes a bit toward these concepts and get a healthier perspective. Most people do not have wacko responses to these emotions, and I hope you do not either.

I only watch the old,old,old movies on DirecTV and most of them are in black and white,I prefer it that way too.(maybe the color movies strain my eyes too much nowdays) I didn't know Jerry Springer is still doing them tv programs.No matter though,I dont watch them anyway.South Pacific,1958 musical (I like them musicals,I always have) movie is on DirecTV,the TCM channel now.I went and saw that movie when it first came out.

> TROLL?

A fair question asked in a reasonable manner. So let me 'splain it.

When -=jd=- was here, he and some of his acolytes/sock puppets/sycophants (who *are* still here) were just *insisting* that there was progress in Iraq, that things were going to get even better after the elections and ridiculing those who dared think otherwise.

Now that the elections have come and gone and Iraq is closer than ever to civil war (WSJ, 2/24/06), I'm just calling their bluff, as I am sure many of us would like to know where this supposed progress is.

BTW, I don't seem to recall you posting any OT complaints against jd.

May I respectfully suggest that you either be consistent--and complain about *all* OT posts or be honest--and admit that you only complain about the OT posts that point out the follies and foibles of the current administration.

>Fuck you. I don't need anyone's pity. <

Geez, nice guy. Well, best wishes back atcha. You need something, pooky. No wonder everyone thinks you're a damn freak...you can't have a civil conversation without becoming a vituperative, know-it-all ass. Even those who agree with you find it impossible to defend your positions, because you're so sour. I had a friend like you once. He was his own worst enemy. He was very smart, had excellent ideas about some things, but was screwy on other things and he so alienated people who should have been his allies that people discarded his ideas along wtih him. He died a drunk at age 46.

>Familial bonding is not ''love''.<

I'm sure, for you, it's not. You're clueless, and obviously don't have the slightest idea what love is. My dead friend couldn't recognize this connection either, and his family disowned him. So, feel free to live (if you can) in your sour, loveless world, and I will thrive happily in mine, with love as a central feature.

Well, if you still don't get it, I guess you should ask all the top people in Congress (*both* parties) why they are so upset and why it has become a national issue.

> The UAE is an ally not an enemy nation and they support the war on
> terror. What is your problem with that? You want to punish our
> allies?

We seem to pick odd allies. Zero 9/11 bombers from Iraq and we invade their sovereign nation. Two 9/11 bombers and financing from UAE and 11 from Saudi Arabia--the cradle of *radical* Wahabism (sp?)--and they are our buddies? Sorry, but the UAE has demonstrated they are pretty 'loosey-goosey' on the war on terrorism (or at least are not adverse towards turning a blind eye).

> Your original post was designed to get a rise out of people like
> myself that read the news group.

No, not designed for that. Clearly marked OT. Please notify your local police of the person or persons that put a gun against your head and forced you to read it.

In a previous post, you gave me some "life" advice. Seeing as turnabout is fair play, my advice to you is either get a bit thicker skin or use your "delete" key.

> Pretty nasty of you.

Reporting on the follies and foibles of the administration is nasty?

I'm surprised you are so concerned about "nasty". I don't seem to recall you speaking up against that drunken degenerate who made several (obviously OT) posts about necrophilia with the dead mother of a NG member who died of cancer. You want nasty? THAT'S nasty!

Well, I'm way past 46.

You're the one who said ''morals'' as if you're some kind of high and
mighty deity. Then, you offer ''pity''. Listen up, Pal; you ain't
Jesus.

''Love'' is a word people are way too casual with. From dead Beatle
Lennon on down. When people say ''I love my car'' or ''I love my
TiVo'' I fucking cringe. If saomeone tells me they love me I ask back
''would you die for me?'' If they say yes, it proves my original
point, doesn't it?

And I am indeed bitter, mainly because ''genius is pain''.

4251. OT The Clintons And The Ports

Newsgroup: rec.radio.shortwave

The Politically Correct vs. the Politically Ridiculous
...
THE CLINTONS AND THE PORTS
Especially precious in this regard is Senator Hillary Rodham Clinton's newfound passion for port security. Fresh from throwing in her lot with partisan efforts to derail the Patriot Act and frame the NSA's surveillance of wartime enemy communications as a crime, the '08 stars in Mrs. Clinton's eyes have suddenly twinkled with a fond memory: namely, how her husband managed to win the 1992 election, in large part, by getting to the right of the first President Bush on what was that era's great global menace - post-Tiananmen Square China. So here she is, trying to elbow her way to the right of the current Bush administration on the scourge of al Qaeda - and hoping the rest of us are struck by amnesia.

You may recall, however, that, upon election, President Clinton proceeded to get tough with Beijing for, oh, about ten minutes. After that, there was no transfer of precious technology and no national security secret that couldn't be had for the right price. Oh, and guess who now controls several port operations on the West Coast? And has for years? Well, whaddya know? It's China.

Indeed, Chinese infiltration of U.S. ports would have been even more pervasive if Senator Clinton's husband had had his way. In 1998, the Republican Congress (led by Senator James Inhofe (OK) and Congressman Duncan Hunter (CA)) had to stop him from turning over management of a 144-acre terminal at the former U.S. Naval Station in Long Beach to the Chinese Ocean Shipping Company - a subsidiary of the People's Liberation Army linked to arms trading to Iran, Iraq, Syria, North Korea, Pakistan, Cuba, and even the street gangs of Los Angeles.

Of course, in the Clinton years, when anyone had the temerity to suggest that maybe it wasn't such a hot idea to give away the store to thuggish, democracy-crushing Communists, we were told such troglodyte notions were insentient to the alchemy of "constructive engagement." This was the very "why make friends when you can let them buy you?" philosophy that led these super-competent, obsessed-with-national-security Clintonistas to sell $8 billion worth of F-16s, anti-aircraft and anti-ship missiles, other advanced weapons, and sundry munitions to - guess who? - The United Arab Emirates.

That happened in early 2000. For those keeping score, that's less than two years after al Qaeda blew up our embassies in Kenya and Tanzania. It is one year after the Clinton administration had Osama bin Laden targeted at a camp in Afghanistan - but called the strike off because the al Qaeda chief was in the company of high UAE officials, including an Emirati prince. A few months

later, while the Clinton folks were getting the UAE its new military hardware, the regime's friends at al Qaeda were blowing up the U.S.S. Cole.

So why do I have this crazy feeling that, in a new Clinton era, we'd be apt to find a lot more "engagement" than exclusion of the UAE (not to mention other dubious "partners") at our ports? In any event, now that Senator Clinton is all over this port thing, it'll be interesting to hear how she plans to tackle those dread Chinese foreigners managing California's coastline - not to mention her explanation of why the administration in which she figured so prominently thought it was okay to sell lots of stuff that goes boom to a country apparently not even fit to run a port terminal.

4255. OT Living with race hate in Russia

Newsgroup: rec.radio.shortwave
Date: 2006-02-24 23:23:36 UTC
From: SeeingEyeD0g <looking@u.org>
Message-ID: <11vv5elq4fek183@corp.supernews.com>
Source record: 64606

"One thing democracy brought Russia was the freedom to insult and attack people and be sure of not being punished," he says.

He can, he adds, count on his fingers the number of criminals punished for hate crimes and "even the murders are immediately treated as cases of hooliganism".

"Because nobody is arrested, it has become pointless to complain to the police."

What worries him especially is that organised groups appear to be inciting the violence with impunity, with slogans like "Russia for the Russians".

Russia is a VERY fucked up place. They have little in the way of a tax system, so they have little in the way of government. What police they do have spend their time intimidating people to not speak out against Putin. If it's not anti-Putin speech, it doesn't bother the cops, even when it's hate murders. Russian society is very strange. The BBCWS had a segment last night on AIDS orphans in Russia, and how no orphanage will take them because of rampant fear of AIDS, so they are warehoused in hospitals and become feral. Russians know little about the war in Chechnya that's taking place in their own backyards. In the countryside, peasants still cook on wood fired stoves. Nuclear weapons are left to rot unguarded. It's only a matter of time before Al Qaeda steals an old Russian nuke and uses it. Even if the trigger is too degraded to make it go boom, they could still make a number of dirty bombs out of one nuke. I really feel sorry for Russia. 75 years of Communist rule really ruined the place.

4269. Sangean ATS-803A

-----Original Message-----
From: [hidden]@IBB.GOV
Sent: Friday, February 24, 2006 8:20 AM
To: IBB Staff
Subject: Greece Transmitting Stations

The history of U.S. international broadcast transmitting stations in Greece stretches back to the early 1950's and is deeply rooted in the atmosphere of mutual cooperation and respect between our countries. During the Cold War, the shortwave broadcasting stations in Greece served as the central focus for our network operations to key regions. These important broadcast transmitting stations clearly helped end the Cold War and to shape the world that we live in today.

Over the past decades there have been tremendous changes in communications, broadcast media and technology. Our transmitting stations in Kavala and Rhodes rely primarily on shortwave and medium wave radio transmission, formats that are expensive to operate. Although shortwave was the focus of international broadcasting for many decades, shortwave broadcasting stations have declined in importance as traditional audiences have shifted to more popular local media such as FM radio, the Internet and television.

The realities of funding, technology and audience preferences have made it impossible to continue our shortwave and medium wave radio transmissions from the facilities in Greece. We have informed the Government of the Hellenic Republic that we plan to terminate our Agreement for the operation of the transmitting stations in Greece.

With deep regret, the BBG will lose the services of many valued and skilled employees as a result of this action. All affected BBG employees will be treated with respect and dignity in accordance with existing U.S. Embassy compensation agreements.

This is a very difficult time for each of us, and we are taking these actions with the greatest reluctance. The employees and staff of the IBB transmitting stations in Greece have provided outstanding service to international broadcasting and the BBG is deeply indebted to them.

George Moore
Director,
Office of Engineering and Technical Services

4280. VOA - Radio programs articulate US values to the global community

Newsgroup: rec.radio.shortwave
Date: 2006-02-25 00:34:38 UTC
From: VOA SWLer <Reply_Here@bogus.com>
Message-ID: <INednexuariBO2LenZ2dneKdnZydnZ2d@comcast.com>
Source record: 64630

From the February 22, 2006 edition -
<http://www.csmonitor.com/2006/0222/p09s02-cojh.html>

Radio programs articulate US values to the global community

The message that all people have the right to liberty is as important as ever.
By John Hughes

SALT LAKE CITY - When I was a foreign correspondent in Africa and Asia, the most valued part of my kit after my portable typewriter was a little shortwave radio. It was my link to the outside world in the remotest parts of those continents. Across the static over thousands of miles, I would tune in each night, when reception was better, to the news from Voice of America - its rousing familiar introductory chords momentarily stirring pangs of homesickness - to get a trusted briefing on what was happening in America and elsewhere in the world.

Years later, when I served as director of VOA, my admiration for it was only heightened by my association with the talented journalists, foreign service officers, and expatriates from various lands who so carefully gathered the news and broadcast it around the globe in a multitude of tongues. Though it was not directed internally to an American audience, Scotty Reston, the famous New York Times columnist, told me that it was his favorite newscast and that he listened to it every night on a shortwave radio.

Today the typewriter is an anachronism, supplanted by the laptop computer, and many have abandoned shortwave radio in favor of television and more modern methods of communication such as Internet websites.

There is a question as to whether there is any longer a critical mass for shortwave listening, and whether VOA and the other government radio stations have outlived their usefulness. Their heyday was in the cold war, and that is long since gone.

The methods of delivery may change, but the subversive message sent to not-yet-free nations - that all men and women have the right to liberty - is as important as ever.

We are engaged in a war against terrorism that, since 9/11, President Bush has warned will be long. It requires force of arms but is also a war of ideas. With the lands of Islam as the heartland of this war, it is understandable that the focus of institutions like VOA, whether the message be delivered by satellite television, or shortwave, or FM radio, should be directed at them. Sadly this means that language services beamed elsewhere are being cut or abandoned, so that broadcasting to Iran and the Arab

countries of the Middle East in their own languages can be increased.

One of the casualties is English- language broadcasting to many parts of the world (except Africa). This is unfortunate because even in countries whose native language is not English, English is often the language used by the elite and the leadership, who are especially desirable targets for VOA's programming.

Other language broadcasts by radio to be cut are Croatian, Turkish, Thai, Greek, and Georgian. Radio broadcasts to go, but which will be continued on TV, are Albanian, Bosnian, Macedonian, Serbian, Russian, and Hindi.

The budget proposed for US international broadcasting in the coming financial year is $671.9 million, actually about 4.3 percent more than the budget in fiscal year 2006. This is a pittance compared to the billions being spent on military operations against terrorists. The ideal would be a budget that could encompass the needs for broadcasting to Islamic lands but still maintain English programs for lower priority but nonetheless important regions. Ironically, China Radio International has just cranked up a new FM transmitter in Kenya beaming Chinese, Swahili, and English to African audiences. Also broadcasting in English is the Voice of Iran. Al-Jazeera has a round-the-clock TV channel in English.

The New York Times reports that "with the retreat of Voice of America from the international market for news delivery in English," a Berlin radio station long used by VOA will be taken over in April by National Public Radio, broadcasting programs like "Car Talk" and "Fresh Air." The Times says NPR seeks to become a respected global voice.

If the war of arms against terrorists is likely to be long, so is the war of words. As we have seen in Iraq, the terrorists have mastered the most modern technology for disseminating their message. We must look beyond the suicide bombers of today, who may be beyond reason. We must reason with the next generation now undergoing brainwashing in the madrassahs, or schools of the Islamic lands.

Nor can the US ignore the rest of the world. Even America's friends must not be taken for granted. They, as well as foes, must hear American policies explained, and America's values and principles reasserted.

In these challenging times, America's voice to the world should be strengthened, not diminished.

ï¿½ John Hughes, a former editor of the Monitor, served as a director of the Voice of America in the Reagan administration.

Well, surprisingly (or maybe not), you would be wrong...

IIRC, they specifically said it was not caused by Katrina (or even the left wing media) but due to the high cost of meds and medical care, rent, natural gas, heating oil and gasoline.

Also, AFIK, this was *just* a survey. Sorry it didn't come out the way you would have liked it to. Can't you ever accept things for what they are, rather than shouting "Left-wing" every time things don't agree with your views?

As an aside , could you please share with us what media you *don't* consider "left-wing"??? (I sometimes get the impression that you think that even the WSJ is a commie pinko rag). :-)

Yeah, I thought about that about 1/2 way thru the scan, it was positioned correctly, but to be sure I switched it back & forth a few times & rescanned. The receiver does pick up the strong signals on the dipole, which definitely puts into question the portability & therefore usefulness, but MAYBE this room has too much RFI for it (several computers). I'm gonna try it outside tomorrow on the whip & see . . .

I have trouble receiving 7415 khz in northern California recently.
After about 0230 UTC the signal strength is below the noise level here.
Typically though I am able to listen during 0400-0700 UTC so WBCQ isn't
usable for me. Read about it in the WBCQ reception report forum:

Source record: 64519

If you have a Ground Mounted, or an Above Ground Mounted vertical, can
you create a lobe by placing your radials pointed in the direction you
want the lobe to occure? or, does the lobe occure in the opposite
direction from which you have the radials pointed?

What is the optimum length for radials:

1/10 wavelength?

1/4 wavelength?

1/4 wavelength plus 2%?

1/2 wavelength?

1 wavelength?

2 wavelengths?

Is the optimum wavelength a function of where the vertical is mounted?
i.e. Ground Mounted or Above Grounded Mounted.

Thanks for your help.

Compared to a tabletop like an R72, the 803A is going
to be disappointing. Compared to a lot of other portables,
it's a nice old radio that handles an external antenna
well without overloading. My Radio Shack equivalent
(DX-440) is still chugging along (or chuffing, since I've
never bothered to make the anti-chuffing mod), and
I let my kids play with it to see what they can pull in.

Hi all
Well, I got the SW77 this morning, and as stated on ebay, it is indded near
mint condition, not a mark anywhere on it.
I did a quick run through the bands and all appears perfect
As of now I am very pleased with it indeed, and look forward to getting to
grips with it a bit later on.
All I can say upto now is that it hears everything my 2010 can hear, but
with better audio and easier ssb tuning
regards
Rikk

Hi,

Will add my two cents in.

Absolutely a great program.
Use it extensively.

Bob

A greedy antisocial species will not survive.

We must all hang together or we shall certainly hang seperately.

4338. FS: Icom R75 With Kiwa Mods and Remote

Newsgroup: rec.radio.shortwave
Date: 2006-02-25 13:30:09 UTC
From: DeWayne <k9kz@indy.rr.com>
Message-ID: <BZYLf.95577$tK4.61598@tornado.ohiordc.rr.com>
Source record: 64538
Cross-posted to: rec.radio.shortwave,rec.radio.swap

I have for sale a beautiful Icom R75 with the following Kiwa mods:

Sync upgrade $45
Audio upgrade $35
Audio Filter upgrade $35
AM BCB attn full disable $25

I just got the rig back from Kiwa this week so they are the latest mods. The R75 is less than a year old. Serial # 0202691. I am the second owner. I am selling because I found a mint Drake R8 that I had been looking for when I bought the R75 :) I doubt you could tell it from new except it's missing two case screws.

It also has the incredible remote system seen here:
http://www.swl-remotes.com/pages/13/

I will ship all of this for $595 UPS ground, insured and double boxed. That's about the price of a new R75 alone. US Postal money order only. If you want to pick it up bring $550 cash. I'm just west of Indy. Please reply to:

Really?

Humans lived sustainably on the Earth for 100,000 years. Since the
advent of Western ''Civilization'' it has been nothing but a speeding
train toward extinction. That's what culture and religion will get
you.

Iranian Official Lectures on TV: Tom and Jerry Cartoons Are a Jewish Conspiracy

On February 19, 2006, Iran's Channel 4 covered a film seminar that included a lecture by Professor Hasan Bolkhari In addition to being a member of the Film Council of Islamic Republic of Iran Broadcasting (IRIB), Bolkhari is a cultural advisor to the Iranian Education Ministry, and active on behalf of interfaith issues.

The following are excerpts from Bokhari's lecture.
http://memri.org/bin/latestnews.cgi?ID=SD110106

To view this video clip, visit:
http://www.memritv.org/search.asp?ACT=S9&P1=1049

China applies cartoon taboos - Animated combos nixed

In one of the more bizarre orders from China's State Administration of Radio, Film and Television, TV shows and films featuring human thesps with animated companions will be banned.

"These human live-action, so-called animation pieces will not receive distribution or distribution licenses," read the order, issued Feb. 15.
...
Chinese regulatory authorities are notoriously skittish regarding broadcast and film themes that include the supernatural or fantasy, including talking animals. "Babe" was banned on the basis that animals can't talk and some viewers would be confused.

THE PROBLEM - "is to cope with the postulates and decide how to proceed."

THE ANSWER - "What do we do when we see that the postulates do not prevail - in the absence of interventionist measures (we used these against Hirohito and Hitler) which we simply are not prepared to take?"

Note: The last sentence is a question. Which clearly is a (middle) finger pointing at the Liberal-Left-wing-"Progressive"-Soicialist-Communist anti-War KooKoo nest.

"...acknowledge a tactical setback, but to insist on the survival of strategic policies."

"within their own counsels, different plans have to be made."

Take care of Damascus & Tehran and the Iraqi unrest perpetrated by Syria and Iran is resolved - PERIOD.

Condoleza Rice is currently in the neighborhood - a MAJOR sign that something is up.

4382. 50 Or 75 Ohm Coax For Receive Only Application ?

Newsgroup: rec.radio.shortwave
Date: 2006-02-25 18:22:48 UTC
From: Robert11 <rgsros@notme.com>
Message-ID: <dI2dnfjev_jzPZ3ZRVn-vQ@comcast.com>
Source record: 64784

Hello:

Will be putting up a new HF atnenna for Receive-Only, to be used from 30 MHz on down

Trying to decide on a coax type for the radio to antenna run, about 150 feet.

As some will be buried in soil, want to have a PE jacket.

It appears that when factoring in the PE requirement, and certainly price, I can
do better, apparently, by picking a 75 ohm coax than a 50 ohm one.

My receivers input is, of course, stamped 50 ohm.

In a practical sense, do you experts believe I would see any difference between
50 or 75 ohm coax for a receive only situation at the 30 MHz and lower listening freq's (150 foot coax run) ?

Thanks,
Bob

This issue has nothing to do with borders. It is global and
transcends nationalism. That being said, the USA still pollutes the
most.

It depends on how the antenna matches the transmission line. Is it a
wire antenna through a 9:1 matcher? If so, the RG-6 will work just
fine.

I have an old National Geographic magazine somewhere around here and the magazine has an article about natural gas that is used as fuel for buses in China.They used to mount big bags about half the size of the buses on top of the buses and fill those bags with natural gas.They could get about fifty to sixty miles per bag full of natural gas.Hey,I have the answer to the fuel problem,do a search for,The Minto Wheel.

4396. World-wide 180 meter SSB Contest - TONIGHT

Newsgroup: rec.radio.shortwave
Date: 2006-02-25 19:14:47 UTC
From: SeeingEyeD0g <looking@u.org>
Message-ID: <1201b8aqbihba62@corp.supernews.com>
Source record: 64798

The CQ World-Wide SSB 160 Meter DX Contest

http://www.cq-amateur-radio.com/160ContestRules122705NEW.pdf

The objective of these contests is for Amateur Radio (Ham) operators around the world to contact other amateurs in as many U.S. states, Canadian provinces, and countries as possible on the 160 meter band.

Started: 0000Z February 25 (7 p.m. EST Friday Feb. 24)
Ends at: 2359Z February 26 (7 p.m. EST Sunday Feb. 26)

Mode: LSB (voice)

Frequency: 1.8kHz to about 1.9kHz
That is just above the MW (AM) broadcast band! So expect propagation characteristics to be best during night time hours with possible interesting propagation occurring within the half hours before and after your local sunset and sunrise times.

Contestants exchange "RS" signal report (typically "59") and state for U.S., province for Canada, and either prefix or country abbreviation for DX.

A typical exchange might be "Five Nine Oscar Hotel" = 59 OH (Ohio).

For SWL's it give you the opportunity to quickly identify the location of each station, learn the propagation characteristics of the 180 meter band and learn how to tune in SSB stations.

Sit back and watch, in 25 to 50 years, you'll see some of the same things happen in America. Even the Brits compared us to the Roman empire and were warning us about that parallel. This has been 20 years ago. Yet, as a nation, we're deeper in debt in the sense of personal debt, deeper in debt through the government, etc.

That's interesting. I don't subscribe to the views of the left wing liberal progressive socialist bullshit. Never have, never will. I am a libertarian in personal liberties as well as in most economic matters. Libertarian is not a socialist.

4431. 75 And 50 Ohm Connectors In Same Listening Chain ?

Newsgroup: rec.radio.shortwave
Date: 2006-02-25 20:33:11 UTC
From: Robert11 <rgsros@notme.com>
Message-ID: <T7KdnTwxJY9gI53ZnZ2dnUVZ_s2dnZ2d@comcast.com>
Source record: 64829

Hello,

Should have asked this also in my previous post re 50 or 75 ohm coax, but
I guess it is probably better to start a different thread.
New at this, so please pardon these very basic type of questions.

For a receiving only application, 30 MHz on down:
Putting up a new Inverted-L receiving antenna.

Radio, Balun, Lightning Arrestor use the 259 type of plug which I guess is
nominally for 50 ohm systems.

I can go with 75 ohm BNC connectors for the main coax run, but am pretty
well stuck with the
259 type for the already purchased units I noted above.

Intuitively, I guess I would like (all) 75 ohm connectors if I am using 75
ohm coax.

But, for 30 MHz and lower listening, would I even notice any difference,
probably ?

Is any received signal lost, or reflected back, at these 75-50 ohm junctions
?
If meaningful, any way around the problem ?

Thanks,
Bob

http://wiki.org/wiki.cgi?WhatIsWiki

Wiki is in Ward's original description:
The simplest online database that could possibly work.

Wiki is a piece of server software that allows users to freely create
and edit Web page content using any Web browser. Wiki supports
hyperlinks and has a simple text syntax for creating new pages and
crosslinks between internal pages on the fly.

Wiki is unusual among group communication mechanisms in that it allows
the organization of contributions to be edited in addition to the
content itself.

Like many simple concepts, "open editing" has some profound and subtle
effects on Wiki usage. Allowing everyday users to create and edit any
page in a Web site is exciting in that it encourages democratic use of
the Web and promotes content composition by nontechnical users.

Historical Note. The first ever wiki site was created for the Portland
Pattern Repository in 1995. That site now hosts tens of thousands of
pages.

CommonDreams.org
'Breaking News & Views for the "PROGESSIVE" Communist'

There is that "P" word again.

What is CommonDreams.org?

Leftwing news and opinion web site intended to be "a progressive political organizing tool."
Founded in 1996 by radical activist Craig Brown
Reflects spectrum of leftwing views from liberal to Marxist-socialist
Closely linked to leftwing entities NewsCenter and Progressive NewsWire

[See http://www.discoverthenetwork.com]

CommonDreams.org is a popular Leftist web site founded in 1996 by radical activist Craig Brown "to develop use of the internet as a progressive political organizing tool."

CommonDreams.org, like a Leftist version of DrudgeReport.com, not only banners the day's hottest news and commentary selected by editor Brown but also provides a huge number of hyperlinks to other Leftist and liberal columnists, periodicals, radio outlets, news services and other left-of-center web sites as well as government sites.

The left-leaning sources hyper-linked by CommonDreams.org range from mild (Newsweek Magazine, Washington Post columnist E.J. Dionne, Jr.) to radically eccentric (Noam Chomsky, Monkeyfist Collective from "The People's Republic of Monkeyfist") to explicitly Marxist (Monthly Review, pundit/historian Howard Zinn).

CommonDreams.org's name was apparently inspired by a co-founder and former President of the radical Students for a Democratic Society (SDS) Todd Gitlin, whose book The Twilight of Common Dreams: Why America Is Wracked by Culture Wars was published in 1995, only months before Brown launched his web site.

CommonDreams.org is closely tied to two other entities - NewsCenter, launched by Brown in May 1997, and the Progressive NewsWire, which publishes de facto press releases by Leftist groups to promote their own rallies, protests and other activities.

Its web site describes Common Dreams as "a non-profit founded in 1996." When an entity is called "a non-profit," this almost always refers to its legal and tax status and suggests that donations are tax-deductible by donors. But at CommonDreams.org, would-be donors who read to the bottom of one of its web site donor pages will find: "Contributions to Common Dreams are not yet tax-deductible."

No critical losses will be incurred by using UHF/BNC adaptors.
Question: Why not use F connectors?

Not sure what urine has to do with anything unless it's either a non
sequitur or a Dr. Strangelovian "preversion" on your part (or both)...

But, nice job of dodging and dancing---you managed to evade answering
both questions!

You really haven't addressed why it isn't *just* a survey, not left, not
right, not any kind of wing, just a plain old survey.

Nor did you tell us what media we can quote without having you jumping
up and down and shouting "Left-wing media".

We are trying to accommodate you, so please, tell us the media we *can*
quote.

Until then, keep on dancin'...

For "receive only" and from a practical viewpoint, no difference at all.

For the 75 ohm stuff, talk to your local cable company; many times you
can get some of their buried drop quite cheaply... Good luck!

Also known as "gray line propagation", when the terminator passes over
your location. And yes, it really does work. I qso'ed Hawaii from
Michigan on 160 a few times via gray line...

After the sun comes up, the D-layer absorption goes waaay up and 160
(and the BC band) is basically good for ground wave only.

The above IS NOT A COMPREHENSIVE COMPARISON. It is simply wiki-propaganda.

A false Wikipedia 'biography'
By John Seigenthaler

"John Seigenthaler Sr. was the assistant to Attorney General Robert Kennedy in the early 1960's. For a brief time, he was thought to have been directly involved in the Kennedy assassinations of both John, and his brother, Bobby. Nothing was ever proven."
- Wikipedia

This is a highly personal story about Internet character assassination. It could be your story.

I have no idea whose sick mind conceived the false, malicious "biography" that appeared under my name for 132 days on Wikipedia, the popular, online, free encyclopedia whose authors are unknown and virtually untraceable. There was more:

"John Seigenthaler moved to the Soviet Union in 1971, and returned to the United States in 1984," Wikipedia said. "He started one of the country's largest public relations firms shortly thereafter."

At age 78, I thought I was beyond surprise or hurt at anything negative said about me. I was wrong. One sentence in the biography was true. I was Robert Kennedy's administrative assistant in the early 1960s. I also was his pallbearer. It was mind-boggling when my son, John Seigenthaler, journalist with NBC News, phoned later to say he found the same scurrilous text on Reference.com and Answers.com.

I had heard for weeks from teachers, journalists and historians about "the wonderful world of Wikipedia," where millions of people worldwide visit daily for quick reference "facts," composed and posted by people with no special expertise or knowledge - and sometimes by people with malice.

At my request, executives of the three websites now have removed the false content about me. But they don't know, and can't find out, who wrote the toxic sentences.

Anonymous author

I phoned Jimmy Wales, Wikipedia's founder and asked, "Do you ... have any way to know who wrote that?"

"No, we don't," he said. Representatives of the other two websites said their computers are programmed to copy data verbatim from Wikipedia, never checking whether it is false or factual.

Naturally, I want to unmask my "biographer." And, I am interested in letting many people know that Wikipedia is a flawed and irresponsible research tool.

But searching cyberspace for the identity of people who post spurious information can be frustrating. I found on Wikipedia the registered IP (Internet Protocol) number of my "biographer"- 65-81-97-208. I traced it to a customer of BellSouth Internet. That company advertises a phone number to report "Abuse Issues." An electronic voice said all complaints must be e-mailed. My two e-mails were answered by identical form letters, advising me that the company would conduct an investigation but might not tell me the results. It was signed "Abuse Team."

Wales, Wikipedia's founder, told me that BellSouth would not be helpful. "We have trouble with people posting abusive things over and over and over," he said. "We block their IP numbers, and they sneak in another way. So we contact the service providers, and they are not very responsive."

After three weeks, hearing nothing further about the Abuse Team investigation, I phoned BellSouth's Atlanta corporate headquarters, which led to conversations between my lawyer and BellSouth's counsel. My only remote chance of getting the name, I learned, was to file a "John or Jane Doe" lawsuit against my "biographer." Major communications Internet companies are bound by federal privacy laws that protect the identity of their customers, even those who defame online. Only if a lawsuit resulted in a court subpoena would BellSouth give up the name.

Little legal recourse

Federal law also protects online corporations - BellSouth, AOL, MCI Wikipedia, etc. - from libel lawsuits. Section 230 of the Communications Decency Act, passed in 1996, specifically states that "no provider or user of an interactive computer service shall be treated as the publisher or speaker." That legalese means that, unlike print and broadcast companies, online service providers cannot be sued for disseminating defamatory attacks on citizens posted by others.

Recent low-profile court decisions document that Congress effectively has barred defamation in cyberspace. Wikipedia's website acknowledges that it is not responsible for inaccurate information, but Wales, in a recent C-Span interview with Brian Lamb, insisted that his website is accountable and that his community of thousands of volunteer editors (he said he has only one paid employee) corrects mistakes within minutes.

My experience refutes that. My "biography" was posted May 26. On May 29, one of Wales' volunteers "edited" it only by correcting the misspelling of the

word "early." For four months, Wikipedia depicted me as a suspected assassin before Wales erased it from his website's history Oct. 5. The falsehoods remained on Answers.com and Reference.com for three more weeks.

In the C-Span interview, Wales said Wikipedia has "millions" of daily global visitors and is one of the world's busiest websites. His volunteer community runs the Wikipedia operation, he said. He funds his website through a non-profit foundation and estimated a 2006 budget of "about a million dollars."

And so we live in a universe of new media with phenomenal opportunities for worldwide communications and research - but populated by volunteer vandals with poison-pen intellects. Congress has enabled them and protects them.

When I was a child, my mother lectured me on the evils of "gossip." She held a feather pillow and said, "If I tear this open, the feathers will fly to the four winds, and I could never get them back in the pillow. That's how it is when you spread mean things about people."

For me, that pillow is a metaphor for Wikipedia.

John Seigenthaler, a retired journalist, founded The Freedom Forum First Amendment Center at Vanderbilt University. He also is a former editorial page editor at USA TODAY.

Pollution is pollution is pollution. If my company only dumps a barrel of toxic waste into the ocean for every fifty cars made, it's still a barrel of crap in the ocean. What country does this is immaterial, it's still global pollution.

Your right to pollute ends at the start of my air, water and food supply. Your twisted outlook will no doubt make you disagree with that.

news:1140656671.702228.181550@z14g2000cwz.googlegroups.com...

Night of the Living Dead -- Two outstanding radio scenes. In George Romero's brilliant foreshadowing, the car radio comes back to life in the graveyard. And who could forget the big Zenith console in the isolated farm house?

Panic in the Year Zero -- Best Conelrad movie, ever.

The Last Man on Earth -- Vincent Price calmly sips tea as he listens for replies to his radio transmissions on "international frequencies". As ever, he hears nothing intelligible. There's no one out there. At least, no one human enough to operate a radio.

(forgotten Russ Meyer movie title) -- Inadaquate man tosses a tube radio into the tub and electrocutes his soapy lover! I had to keep repeating to myself, "It's only a movie, it's only a movie, ...". Imagine, using such a noble instrument as a radio for murder!! I'm still so traumatized I can't remember the movie title.

Dementia 13 -- A man and a woman row out to the middle of a lake. A transistor portable is playing some rockabilly song. She can't stand rockabilly and takes the oar and uses it to beat the man about the head. He falls to the bottom of the lake. She tosses the radio in after him. The radio continues to emit ghostly sounds as it sinks. Had the oar been a radio in the other pair of hands, and the woman was of lathered Russ Meyer proportions, I'm sure this movie would have impacted me as the previous one on my list.

Dr. Strangelove -- The airbase Peter Sellers finds a radio and listens to a few stations. He finds the outside world is going normally. Without that radio, the airbase Peter Sellers may have never learned that Gen. Jack D. Ripper was completely insane.

Attack of the Killer Shrews -- Yes, they had an antenna, transmitter and receiver. But the radio was broken. And mutant killer shrews, the size of collies, were roaming the island. Ah, for want of a radio, ...

Ray -- Ray Charles, always a quick study, takes in a Nelson Eddy tune as it plays on a bus driver's portable. It's just like Babe Ruth learning more about baseball by carefully watching other ball players. Well, kinda like that.

Blast from the Past -- Here the character played by Christopher Walken neglects to take his trusty Hallicrafters S-40 into the fallout shelter, and fails to learn that the Cuban Missle Crisis didn't go nuclear. What was he

listening to while he was doing all that construction? I guess you can't believe everything that shows up in the movies.

White Heat -- Thanks to high tech smack dab in the middle of the twentieth century radio tracking, the evil psycho didn't have a chance. Even if the evil psycho was played by Jimmy Cagney. Oh, make that radio tracking and oil refineries.

In 20 years the national debt has gone up SIX TIMES, from $1 trillion to
$6 trillion, mostly under Republicans. Reagan at least had a good reason
to be a big spender-he was hoping that the Soviets would try to match
his military spending dollar for dollar, which they couldn't do without
killing their economy, and sure enough they took the bait and ended up
losing the cold war. But Bush has added $2 trillion to our debt in just
five years, and it's all gone down a rathole. He spent a fourth of it on
the war in Iraq. Republicans have so successfully pegged Democrats as
big spenders that nobody seems to care that the Repugs are running up
the debt far beyond our ability to pay it back because "deficits don't
matter" in the words of Dick Cheney. Bill Clinton balanced the budget,
but the Repugs impeached him because he fucked his interns. Bush has
shredded the Constitution, eliminated all debate about his policies,
created more terrorists than he's stopped, put America in grave fiscal
danger, and the Repugs can't get enough, they want to be ruled by him
forever, they think he's a god. Go figure. Republican presidents have
all but sunk America's economy and handed over what little growth occurs
to the super rich. All the growth in profits goes to to the CEOs while
the little guy gets laid off and his wages slashed and his hours
increased. The corporate controlled news tells us how great the economy
is while ordinary people suffer and the CEOs walk away with billions.
It's like Orwell's 1984 where the telescreen talks incessantly about how
great things are while in real life things become increasingly wretched.
The rich are robbing the Treasury and making everybody except themselves
go deeper into bad debt, and everybody includes the government.

Bill Clinton did not balance the budget (a common fallacy). The Republicans in
Congress balanced the budget. The reason it wound up being balanced was that the
Republicans had the good sense to toss out many of Clintons budget proposals.

It's a line from an old comedy album:

I RESENT performing for you fuckers
Tell me, what do you know?
A lot of faggot middle-class kids wearing long hair and trendy clothes
Look, I'm not your fucking parents
And I'm sick of uptight hippies coming knocking at me door
With a fucking peace symbol
Get lit, fuck that, I don't owe you fuckers anything
And all I got to say is FUCK YOUUUUUU
The sky is bluuuuue

And Mick Jagger, I think that Mick's a joke with all his stupid faggot
dancing
I always did, wiggling his ass you know, it's just a lot of bullshit
And where does he come off saying all those tarty things about The
Beatles
When every fucking thing we ever did Mick tried to copy
And you know we even wrote his second fucking record for him
No, The Stones aren't in the same fucking class as The Beatles
Either music wise, or power wise, and never ever were
Pardon me, sir

Paul said he hated Yoko
Tell me, why should Yoko have to take that kind of shit?
Shit from those fucking sons of bitches?
George said she gave off evil vibes
I should have beat the fucking shit right out of him
Him with his fucking Hare Krishnas

Me auntie, she tore up me fucking poems
She just threw the bastards out
I can't forgive her, 'cause she didn't treat me like a fucking
genius--
Look, you bastards, I'm a genius, like Shakespeare and Beethoven and
Van Goth! Don't you DARE criticize my work! "Don't Worry Kyoko" was
one of the fucking BEST rock and roll records ever made! I'm a fucking
ARTIST! I'm sensitive as shit! I throw up before I go onstage! I can
make a guitar SPEAK! If I could be a fisherman I would, but I can't,
because I'm a FUCKING GENIUS! I was the Walrus! PAUL wasn't the
Walrus! I was just saying that to be nice, but I was actually the

Walrus! Him and that RUBBISH he's been singing! Eastman was an ANIMAL! A FUCKING STUPID MIDDLE-CLASS PIG! I won't let fucking animals like that near me! Yoko is a SUPREME INTELLECTUAL! I'll tell you why nobody likes her music -- because she's a woman and she's Oriental, that's why! WHERE ARE YOU, MOTHER? THEY'RE TRYING TO CRUCIFY ME!

Genius is pain
GENIUS IS PAIN...

There used to be rain forests which removed pollutants produced by
volcanoes. Now we have no rain forests and we still have volcanoes
plus we burn millions of tons of coal.

The Soviets collapsed because they had an expensive unwinnable war in
Southwest Asia. Reagan was a big phony. Bin Laden defeated the
Soviets.

4491. jamming on 7205 khz

Newsgroup: rec.radio.shortwave
Date: 2006-02-26 00:57:18 UTC
From: weatherall <weatherall.23tgxj@news.radiobanter.com>
Message-ID: <weatherall.23tgxj@news.radiobanter.com>
Source record: 64860

I was tuning through the 41 meter band when I heard an interesting but weak signal on 7205 khz. It sounds like spanish, and it is overlaid with the sound of running water. The running water effect is the same as the jamming that I hear on Radio Marti frequencies.

Anyone know what this broadcast is? 7205 khz @ 0035 UTC.

Radio Marti broadcasts at this time on 7405 khz from Greenville, NC, USA. (http://www.martinoticias.com/frequencies.htm) That frequency is silent here though. Maybe Radio Marti switched frequencies or the page is simply wrong? If it is Radio Marti, the jamming must be from Cuba.

You haven't checked on rain forest lately.By the way,Mississippi has more forest (I didn't call them rain forest) than any other State in U.S.A.and we always get plenty of enough (sometimes too much rain in low lying areas) rain. www.google.com Mississippi Trivia

The country bumpkin facade is hard to maintain all the time, ain't it?
can't fault you for slipping now and then. Now, if you could teach RHF
how to put together a borderline normal set of sentences, such as the
above, you'd be doing everyone a favour.

mike

And your point is???

They both don't have to be. Please see the real propagation experts
quoted below (not some humbug from a blathering, self-appointed "ace"
poseur). Especially take note of the final sentence of the second quote.

> The gray line is not a simple north/south line running around the
> globe from pole to pole across the equator; rather, it presents
> numerous east/west possibilities.

and from another big gun low band propagation expert:

> Some authors have stated that gray line propagation always occurs
> along the terminator. On the low bands, there has been only
> occasional proof of such propagation. Rather, propagation is through
> the dark zone, on a path that (in most cases) is nearly

> follow the direction of the gray line.

Also, your mileage figure is about 700 miles short (not that it makes
any difference, mechanism-wise; it just shows a further lack of research
on your part).

So, two items were discussed: mileage and mechanism--and you struck out
on both. Some "ace" you are... :-(

Now be a good boggle boy and finish your homework...

I didn't know that the environment cared about the GDP. How does that
affect basic physics and chemistry? In all my years of studying both topics,
I have yet to find a chem or physics book that takes GDP into account.

What you had was sunrise enhancement, not grey line. I've already done my homework (in other words, I don't believe that, 'big gun' or not).

As far as the mileage goes, that wasn't a figure I tossed out, so please try to read with a little bit better comprehension, and remember it was expressed in 'nautical miles' and may have been measured from his location, not yours and not mine. So perhaps you'd better finish YOUR homework, boy.

Radio Republica, a clandestine broadcast to Cuba, has been using that frequency in the past few weeks so the jammer may still be hanging out there. (The Cubans have been slow to move their jammers even if the clandestine has shifted frequencies).

All I'm hearing here at 0216 is the jammer, but that might just be propagation.

Just checked and I see that Radio Republica is sked on the freq till 0200. And as
I'm typing this, the jammer stopped at 0220.

Oh it was caught, but I didn't want to confuse ol' Carter even more. He has his hands full trying to understand that a signal that doesn't follow the grey line shouldn't be called grey line propagation.

What he actually has is sunrise enhancement or what may be an even better name for it might be 'terminator enhancement'.

China literally DOES dump barrels of toxic waste in the ocean.
Puposefully and without regard.

> Your right to pollute ends at the start of my air, water and food
> supply. Your twisted outlook will no doubt make you disagree with that.

Your confused little mike. The issue at hand is carbon or CO2 pumped into
the atmosphere.
You know, that toxic waste you exhale every time you open your mouth.

Relative to global GDP China is No.1 as the worlds worst global warming
contributor.

So, if you have car "A" that pollutes at the rate of twice that of car "C".
And Car "A" gets 3 times the MPG of car "C". Which car will you send to the
junk yard?

Now my landscaping plants are growing faster then they used to before all
this extra CO2 was in the atmosphere.
Now I have to cut my grass three times a week instead of the usual two.
Using even more gasoline to keep up with that CO2 rise causing my plants to
grow that much more faster. A never ending cycle - sigh.

Dear Lawn Man,

Is there something we can put into the atmosphere that will keep my grass green
in mid-summer when it doesn't rain?

Wow! The Liberty Net is getting the crap jammed out of it tonight on
3.966 Mhz. It almost sounds like 3.950 circa 1996 ! Ahhh, nostalgia.
Sigh.

Yep, and neither is the atmosphere. So GDp is quite irrelevant. Pollution
is pollution.

My yard is green,green,green,especially with all the rain we get here and my yard (the green stuff,most of it looks sort of like some kind of clover stuff in some places in my yard,about five inches tall,or ankle high tall and more of my Dafodill plants are starting to bloom) really needs mowing.I will not mow my yard if it is even slightly damp.

Last I checked earlier this month, the current US federal deficit was approximately 8.18 trillion. Under Reagan the deficit increased from 1 trillion in 1980 to almost 3 trillion in 1989. During Bush I, it went from 3 trillion to 4.3 trillion. During Clintons administration it went from 4.3 trillion to 5.7 trillion. During the last five years it has now increased to 8.18 trillion. Those were facts I was able to glean from the world almanac itself.

I generally agree with your post. Look at all of the jobs created the past several years and notice that they pay less. There was a nice piece in the newspaper on Friday that the family income has fallen the past several years from 2001 to 2004. Spend a little time looking at the average wage and it has decreased too. Talking about crooks look at when Jack Welch screwed GE into the ground and the workers got it worst. Then they have audacity to give him a big bonus and retirement send off.

The government includes the people because the people in general and the future generations will pay for the debts and credit issues ran up by sucessive administrations both Republican and Democrat. Spend a little time in your closest big city and see how many people are just getting by at best. There's always been hell holes but its getting increasingly worse.

Again you selectively pick your information. I don't know why you do
this. I can speculate that you select information to self delude in
order to fit some preconceived notion to which you have an emotional
attachment.

You are not being logical. I can't nor do I have a desire to argue with
irrational people.

Marking a post "OT" in no way mitigates the fact that it is off topic
and basically amounts to trolling as it plays on peoples sensibilities.
It got a rise out me didn't it.

> In a previous post, you gave me some "life" advice. Seeing as

No your language was nasty and designed to get a rise to anyone reading the post that believes Bush is doing the right thing. Again it got a rise out me didn't it.

> I'm surprised you are so concerned about "nasty". I don't seem to

Interestingly, the Republicans had control of the house and senate from 1994 onward. Interestingly Clinton also didnt veto these budgets. Because the Republicans never had a super majority of 67 votes to overide any veto.

Anybody following this issue knows that the deal was announced last
November. This deal did not rise to the point that Bush had to directly
deal with it. This change of ownership of a private business was to be
reviewed at the agency level. This review was preformed and approved.
End of story.

Well Mark you can turn most any issue into a partisan conflict and call
names if you want but if you do so then you lose all pretense of being
serious to anyone that reads your post. Rather pointless in light of the
topic being off topic to begin with. If your goal is to inform then do
it and be done with it.

Again JD is in the kill file because he only posted off topic so I
don't see his posts. Hence no comment from myself.

You are making incorrect assumptions about my posting behavior because
I don't see these other obnoxious posters. I don't like name calling.
Once in a while is fine but when most or all of the time the person
posting is obnoxious for any reason they go in the kill file. It could
be because of foul language, the majority of posts off topic, name
calling or obvious Trolling of some fashion.

This is not some precise science. When someone becomes tiresome to read
for some reason I just get to the point that I don't want to read them
any further and they go in the kill file. Simple as that.

As a general rule I don't like to see USA jobs outsourced either. Some
jobs, when it makes sense to do so is OK with me but this should not
happen in large numbers. Same goes for investment dollars but currently
most investment dollars in the USA is going into foreign markets.

I think that most investment dollars going into foreign markets is a
much bigger problem than the job outsourcing.

> Is the optimum wavelength a function of where the vertical is mounted?
> i.e. Ground Mounted or Above Grounded Mounted.

The basic antenna that responds to the far electric field from a
broadcast station is 1/2 wavelength formed by two elements of 1/4
wavelength each in line or 180 degrees apart. This is called a dipole
antenna.

The ground plane antenna is the same except that the two elements are 90
degrees apart with the driven element vertical and the counterpoise
element horizontal. The counterpoise element(s) in the ground plane
antenna need to be all around the base of the driven element so that the
antenna response pattern is the same in all directions. Four elements
equal spaced about the base is usually considered the minimum required
to get an even response around the antenna.

With one counterpoise element the maximum response with be in the
direction of that element.

This antenna can be mounted at ground level or at some level above it. I
don't understand what you want to know with the question "optimum
wavelength a function of where the vertical is mounted." Generally the
higher the antenna is mounted the better it will function but a ground

plane antenna will work well at ground level if it is in the clear.

Well there is a difference but you may not notice it. Generally you
spend your money to get the "best bang for the buck" so the price
difference is an important determinant.

If you already owned the 75 ohm coax I would say use it but I would not
advise you to buy the 75 ohm coax unless the difference in cost between
it and the 50 coax warranted it.

> Is any received signal lost, or reflected back, at these 75-50 ohm
> junctions ? If meaningful, any way around the problem ?

Technically yes you will lose signal power in your antenna system with each incorrect connector. WIth several wrong connectors the situation gets complicated with multiple reflections in the antenna system. Practically though the connectors have a very short electrical length at 30 MHz and lower so the effect of impedance mismatch will be small.

The best thing to do is use all the right stuff. Use the right cable and connectors.

Using the wrong stuff has another complication in that you can have mechanical trouble putting connectors on the coax. Mechanically things may not fit well or at all. Connectors are designed with a size coax in mind where 75 and 50 coax are not of the same dimensions.

BNC connectors are more commonly 50 ohms.

Yeah, we could be making all this stuff up
By DOUG THOMPSON

Printer friendly page

Whenever we get a story ahead of other news outlets the naysayers
crank up to full crescendo and accuse us a variety of transgressions -
usually revolving around the claim that we "made the whole thing up."

A lot of that came over the electronic transom and dominated the
partisan bulletin boards Wednesday with our report that secret service
agents said Vice President Dick Cheney was drunk when he gunned down
friend and lawyer Harry Whittington in a hunting "accident" last week.

It wasn't a story we went looking for. A friend who works in the Bush
administration tipped us on the report late last week and I started
making phone calls. By late Tuesday, I had all I needed to go with the
story: three sources that said a Secret Service Agent filed a report

claiming Cheney had consumed several drinks and "appeared inebriated" while hunting on the Armstrong Ranch on February 11.

In light of other events that we and others had already documented on that day, the report made sense: A day-and-a-half delay in reporting the shooting to the press; the refusal by owners of the Armstrong ranch to allow the Kenedy County chief deputy on the property on the day the "accident" occurred and the strange decision by the county sheriff to not interview witnesses until the next day.

Running with the story brought the usual chorus of boo-birds, the armchair commandos who dominate the partisan bulletin boards, claiming that I sit up here in my mountaintop home and just make these things up.

In reality, I could be doing just that. But why should I? The bizarre antics of the Bush administration provide far more interesting fodder for stories than anything my imagination could possibly conjure up.

Despite what the naysayers claim, we get it first and get it right. We reported on Bush's temper tantrums a full year before it appeared in Newsweek. We revealed Bush's executive order allowing the National Security Agency to spy on Americans on June 7, 2004 -- 18 months before the New York Times printed the story. Last week we revealed President Bush ordered Vice President Cheney to go public about his hunting "accident." Time got around to it a few days later. I have no doubt that more information about Cheney's drinking will surface down the line and confirm what we reported Wednesday.

We're human and we do make mistakes, but when we do we admit them, which is a lot more than most media outlets ever do.

So what possible motive could I have to subject myself, and this web site, to the barrage of abuse that comes from the prickly partisans whenever I raise the curtain of corruption on their favorite sons?

Some say it's because I'm a liberal, which shows what little they know. How many liberals are card-carrying members of the National Rifle Association or worked for conservative members of Congress like Manuel Lujan Jr. or the 1984 Reagan-Bush re-election campaign?

Others claim the stories are drunken hallucinations, which might make sense if I weren't a recovering alcoholic who hasn't had a drink since June 6, 1994. Still others say it's drugs. Yeah, Tylenol arthritis pain formula, Zestril hypertension medication and Johnson & Johnson baby aspirin are real mood-altering drugs.

And still others claim I'm a bitter, lonely old man living out his final days lashing out at others. I could let my wife answer that one, or the student photographers I mentor or the young people I work with on various projects. I'm too busy with a full, enjoyable life to come up with an answer myself.

Frankly, I don't give a damn what the naysayers think. I've served my country more than once to preserve democracy and try and make this nation a better place to live. I've worked within the political system in Washington and tried to change it for the better from the inside. While others talked about change, I worked with real lovers of America to make it happen. While others talked about doing, we did.

Others talk about truth as if it were some divine providence of a political party or philosophical organization. Truth is non-partisan. It crosses party lines and follows no philosophical path.

We piss off partisans from both sides because we follow the truth wherever it leads. We don't give a damn who gets mad or who gets exposed. We don't apply different rules to different parties and all are held to the same standards.

We don't play favorites. Never have, never will. And we don't have to make this stuff up. The truth is far more interesting, even if the partisans don't want to believe it.

4562. Utility Station Listings

Newsgroup: rec.radio.shortwave
Date: 2006-02-26 13:48:41 UTC
From: Lenny <freilich@comcast.net>
Message-ID: <-oGdne4E9uZ8LJzZnZ2dnUVZ_t6dnZ2d@comcast.com>
Source record: 64964

Just wondering where I can find some good listings of utility stations.
I'd love to hear some Coast Guard search and rescue stuff, ship to shore,
mil air traffic,
drug interdiction, etc.
Thanks all,
Lenny

Please note, this post was on topic and not filled with insults to anyone.
Some people really need to get a life or counselling, or both.
I think we all know who fits in that category.

Please Wake Up America...

Haven't you seen that you have put a president in the whitehouse who manipulates you with fear and lies... talking out of both sides of his mouth??

On the one hand you have Bush telling you that he is going to start a war in Iraq to protect you from Arab Terrorists .... then Bush gives control of U.S. Ports To an Arab Crime Capital... PORTS HAVE BEEN IDENTIFIED FOR OVER FIVE YEARS AS THE MOST VULNERABLE SECURITY WEAKNESS IN AMERICA...IT IS WHERE ONLY FIVE PERCENT (1 IN 20) CONTAINERS, THE SIZE OF A HOUSE OR BIGGER, ARE EVEN OPENED AND LOOKED IN... THIS IS WHAT IS COMING IN AMERICAN PORTS.

HOW MANY NUCLEAR BOMBS CAN FIT IN ONE OF THESE CONTAINERS... HINT: MORE THAN ONE AND IT ONLY TAKES ONE TO BLOW UP YOUR CITY AND ANY CITY WITHIN THIRTY MILES OF YOUR CITY.

THIS IS WHAT BUSH GAVE CONTROL OF TO AN ARAB COUNTRY THAT IS KNOWN AS A CENTER OF MIDDLE EAST ORGANIZED CRIME...meanwhile you go on supporting Buish because he is going to force poor women back into back allies to get abortions performed by amateurs... meanwhile if a rich woman wants an abortion she will be able to get one in a rich hospital just like always.

BUSH DIOES NOT GIVE A DAMN ABOUT ABORTION, OR THE PEOPLE OF IRAQ... THESE ARE LIES THAT HE MANIPULATES YOU WITH.

UAE terminal takeover extends to 21 ports
By PAMELA HESS
UPI Pentagon Correspondent

WASHINGTON, Feb. 24 (UPI) -- A United Arab Emirates government-owned company is poised to take over port terminal operations in 21 American ports, far more than the six widely reported.

Bush needs to perpetuate the war on terror so he and his budddies can stay
in power and keep getting rich off of inflated oil prices. Handing over the
ports is just opening the door to America so the next terrorist attack can
take place and keep us in this war forever.

The wikipedia is in many ways a compromise. There is a real risk that
as an open encyclopedia it contains some explanations are at best less
than complete or not well vetted. And yet there is clear value to
having information coming from potentially many sources that is more uo

tp date than that found in a 10 year old printed encyclopedia.

I find WIkipedia great when looking up something I know nothing about
for two things;

- The external citations.

- The "discussion" tab, in which if there is controversy or alternative
explanations, there will be debate will be agrued without censorship.

I wouldn't ask Wikipedia for legal or medical advise but I might go
there for some reading references, concepts and definitions before I
talked to my expert.

Wikipedia beats established references in that alternative voices can
be heard and corrections are *possible*. You can't do that with 50
pounds of Britannica or the newspaper back issues on microfilm.

Nothing is perfect and somebody said the perfect is the enemy of the
good. Wiikipedia will survive those that want to spread cynicism of
all fact-based media.

And exactly how is a nonexpert, or someone who comes to wikipedia out of the blue, to know which facts are and are not accurate? Who corrects the correctors? It's an interesting idea and a fun site, but untrustworthy (cf. SeeingEyeDog and Siegenthaler posts above).

Well, you sure do like to like to eat dust. I gave you a clue and a chance to do a little bit of research to prove your "ace-hood", but you couldn't figure it out. Yet another failure for you.

The quote from the "big gun" you don't believe is John Devoldere, author of "ON4UN's Low-Band DXing", a classic text that has gone through numerous printings and two editions. He is regarded world-wide as THE low band propagation expert.

He calls the mechanism described as gray-line, not enhancement. I have no doubt that this is *exactly* what I experienced with my 160 meter Hawaii qso's. Although I realize you have that pesky reading comprehension problem, try going over his quote once more.

If you expect us to take the word of a blathering, self-appointed poseur against the word of an internationally renowned propagation expert, you're more delusional than we think.

Pardon me, but my money's on Mr. Devoldere, at least until you reach his level of world acclaim for something other than being a poseur and boggle boy extraordinaire.

You're incorrect. Grey line propagation means just what it says, propagation
ALONG the grey line. What you experienced was NOT grey line propagation since
Hawaii is not and was not on the grey line. Nor can it be from your QTH. Mr.
Devoldere can call it anything he likes, however that does not make it correct.

What you experienced was sunrise enhancement, plain and simple.

Sorry that you can't get a handle on that (nor the mileage issue!) but it's not
my problem!

You'd better go back to propagation school, boy.

4598. Silicone Grease In Coax Connectors; Comments And Questions ?

Newsgroup: rec.radio.shortwave
Date: 2006-02-26 17:15:54 UTC
From: Robert11 <rgsros@notme.com>
Message-ID: <8NKdnSqXZ-LUf5zZRVn-gw@comcast.com>
Source record: 65000

Hello:

Regarding those Si paste products that one see advertised to coat the innards of a coax
type of connector to prevent moisture seepage, be an anti-oxidant, and all other great things:

e.g. from ICE:

"Model 615 items are comprised of a synthetic silicon grease material, thick but easily spreadable. Suggested uses are to fill the void of RE connections or high voltage joints. Grease is easily pushed out of the way by mating conductors, but fills the void around them to prevent air and moisture from settling in. Excellent dielectric characteristics, non-miscible with most chemical agents or vapors, grease is opaque and maintains thick viscous nature in temperatures ranging from -60F to 500F."

Not at all certain about this, but my guess is that even after pushing the contacts together, the boundary layer film that separates the metal male and female parts would be at least of the order of a micron; probably more.

For transmitting power levels, I guess there is more than enough current flow to puncture thru easily.

But what about for a receiving only application, with what, micro-amps, across the gap ?

Does this silicone "layer" present any problems, or signal degradation, in your experiences ?

Good thing to use in coax connectors going to a receiving antenna ? Or,...?

Thanks,
Bob

The example you cite is very suspicious. As though someone had
intentionally did it to discredit the wikipedia.

Fascists' biggest enemy is the free flow of factually correct
information. They always try to discredit media they cannot
manipulate.

Regardless, the Wikipedia folks have added safeguards.

Yes, however at any point in time the information has the potential to
be highly inaccurate because of the number of people who could be
involved in forwarding updates. You may be asking for the history of
the Catholic church, for the roots of Nazism or the background on
evolution and the information may include some incomplete and possibly
highly biased opinions at any one point in time. Additionally not all
of us are skilled researchers.

It is your duty as a citizen of the USA to be somewhat skilled in
digging up facts. They should teach children how to be media
consumers in school.

Thanks for the help. I found a Radio Republica page on
clandestineradio.com and now I know there's at least two stations
jammed by Cuba.

It sounded like Radio Havana Cuba was a few minutes slow the other
night. Maybe they need to fix their clocks.

There is bound to be a voltage drop across across almost any mechanically joined conductors. A light switch has a voltage drop across it's contacts. A solder joint would a greatly decreased drop, but it's there regardless. A solder joint is a mechanical connection, while a weld is a chemical fusing.

I wouldn't think the silicon layer is consistent throughout the contact area. There are most likely high areas of metal to metal contact, with the paste filling in the valleys.

Any loss of the borderline contact areas due to silicon invasiveness would be more than made up for by the protection from oxygen, ozone and water given to the good 'peak' areas. The good stays good longer.

We could do a simple test with a connector, some coax, a small battery, a limiting resistor and an accurate voltmeter. A series of before and after tests could be performed, trying different substances. Vaseline has been used for battery post connectors for years.

As an unrelated side note, I met a mechanic once who carefully cleaned off all that white grease from back of regulators and diodes before installing them. It took him years to figure out what the stuff was meant to do. He had a real 'sinking' feeling when he found out.

I have made thousands of professional RF connections (not Cable TV)
and never have I seen a connector that requires greasing.

We use Andrew 221213 Waterproofing Kits, on the OUTSIDE of the connection. Good RF connectors are usually silver plated and require no grease.

I can see that. I'd imagine the waterproofing kits have to be pretty well made to keep moisture out. Silver, while a lot better conductor than gold, oxidizes very easily. Lots of oxides don't conduct electricity at all.

Unless registration involves somehow vetting contributors for certain
areas the problem of seriously wrong information is still there.

Well, digging up information is one thing, but determining whether the
information is correct, is quite another. What are the credentials of
the people posting to Wikipedia. With an organization like Encyclopedia
Brit.. you had a chance that they would hire trained researchers with
knowlege in specific areas. With Wikipedia anyone with a thought on a
subject can post and presumably have the information included for the
world to read as a "fact".

If the metal to metal contact is firm oxidation will not bother it.

It is not unusual for a typical TV station to have dozens of
''silver'' bullets in the transmission line (these join the inner
conductorsin rigid line) last for decades with no ill effects. They
are kept dry, of course.

Let me quote Mr. D once again:

> Some authors have stated that gray line propagation always occurs
> along the terminator. On the *low bands*, there has been only
> occasional proof of such propagation. [my emphasis added]

Which virtually disputes what you said above.

He goes on to say:

> Rather, propagation is through the dark zone, on a path that (in most
> cases) is nearly perpendicular to the terminator.

Which is what I experienced--sunrise here, through the dark zone to
Hawaii, which is roughly perpendicular to Michigan.

> Gray line propagation on the low bands is a *different affair* from
> what is often called gray line propagation on the (higher) HF bands,
> where the propagation path does follow the direction of the gray
> line. [my emphasis added]

This may be where you are getting confused...

> What you experienced was NOT grey line propagation since Hawaii is
> not and was not on the grey line.

Read it again, slowly, (and fight that comprehension problem). On the
low bands, -it-doesn't-have-to-be -ON- the gray line.

Well, now let's have a little "Rocket Science 101"---do I believe a
blow-hard know-it-all (that doesn't) or do I believe the world's
foremost low band propagation expert. (Gee, I hate those hard decisions!)

P.S.

As you're such the expert and have had so much experience on 160 and
spent so much time on the band, please feel free to share *your* 160 DX
contacts with us...and don't forget to tell us the title of *your* book.

Oh?... What's that you say?... You can't? Well, sorry then, the smart
money is *still* on Mr. D.

(Damn, boy...you really *do* like that dust!)

A shift of the "magnetic" pole, which is happening constantly, would have
zero impact on earth's sunrise/sunset times on any given point of the earth.
The earth would have to physically shift its "axis of rotation" away from
the North star to create a "gray line" that runs through Hawaii and the
mainland. The magnetic pole would follow it.

My argument is not if it is useful. It clearly is within reasonable
expectations. BUT it is entirely inappropriate to refer to it as an
"Encyclopedia".

I'd say he is incorrect with his 'only occasional proof' comment. But once again, if it is not following the grey line then it is not grey line propagation.

> Which virtually disputes what you said above.

Of course, and yet again, NOT grey line.

Then it is NOT grey line propagation. Pretty simple. It's then a darkness path, or a path enhanced by sunrise (or in other cases by sunset).

> Well, now let's have a little "Rocket Science 101"---do I believe a

Never stated that I had much experience on 160, though I have certainly made contacts in that band. I'm experienced in low band 2 and 3 MHz SWBC monitoring. If you wish to talk about 160 meter contacts I suggest as I have before that you find a suitable amateur radio group!

> Oh?... What's that you say?... You can't? Well, sorry then, the smart
> money is *still* on Mr. D.
>
> (Damn, boy...you really *do* like that dust!)

Once again, if the propagation does not occur ALONG the grey line then it is NOT grey line propagation. To call it that as you have and as Mr. Devoldere seems to indicate is simply not precise, correct, or factual.

Get a grip, and try to understand why it's known as grey LINE propagation and not simply 'grey spot' or 'grey time' propagation.

Since this is a 'shortwave' oriented newsgroup and not an amateur one, perhaps
you'll share your SWBC listening/dx'ing experiences and loggings with us.

SWBC countries heard, SWBC countries QSL'd, etc.

The title of my book? It's called 'Tards Suck, and So Do Trolls'.

Take a look at the Discussion tab on the Wiki page for any
controversial topic. You'll find all sides arguing. You use your own
brain and make conclusion ot decide to look elsewhere.

This is in my opinion better than a a book in the library where you
don't know in the author was Making Shit Up or the fact checker took
the day off.

If yoiu are researching something that you know *nothing* about you
need to do *lots* of reading from many sources tu have a framework of
what you thing is fact. That's not Wikipedia's fault.

Any mathemetician, say, can find things on a Wiki page about math to
complain about, but these same people will find problems with *any*
popular treatment of the topic that is their speciality.

You can say the same thing about any book in the non-fiction part of
the library. Unless you know something about the topic, or the
author's credentials you don't have a clue about how accurate a book
is.

Or worse:

"I have already called the police, and told them there is a lot of Taiwan
independence, Falun Gong and other reactionary content here," the user
wrote. "I even gave them many entries as examples. After a few days, they
will come for an inspection. You'd better get ready. . . . Ha, ha."
...
In December, a message appeared on a Wikipedia page alleging the site had
been "conducting anti-China activities under the flag of being neutral" and
accusing its senior users of being "running dogs for American imperialism."

Some suspected the note was posted by a government agent.

This is another propaganda piece. There is no explicit citation of the 5,
6, 11, 21 or zillion ports.
Not even one port is mentioned by name and its precise location.

Message-ID: <44021B55.E3ED199C@milestones.com>
Source record: 65164

Hearing Radio Nacional, Angola (p) here, very weak on 7216.7. Hard to tell whether the broadcast is in French as sked or in Portuguese.

Possibly running the old 15 kW transmitter, and even that would seem to be on reduced power.

Perhaps conditions will improve as they are sked in English at 2200.

I would not expect the silicone to remain as a barrier layer between
the male and female contacts. The contact pressure should cause metal
to metal contact. You could verify this with an ohm meter with a before
and after measurement.

If an insulative barrier was formed then it would form a capacitor.
This cap would behave as a high pass filter. The larger the cap formed
the lower the corner frequency on the high pass filter.

I suppose this product exists, but I have never heard of any ham using
silicone grease in his/her coax fittings.

(Of course, I don't normally ask people such things. Still...)

Robert, just because a product exists, that doesn't mean you have to
attach it to your antenna :-)

Simple is better...

If you could define ''grow up'' I may consider it. As far as I can
tell ''adult'' means pornographic.
```

Chad apparently left the frequency today at 2230 (vs. possible 2300 yesterday) after playing their anthem, leaving Croation Radio in the clear which was ID'd here at 2257 after at least a half hour of non-stop music, some of which was in English.

Radio Netherlands comes up on the frequency at about 2258 then into Dutch at 2300.

Radio Havana is NEVER on time. Sometimes they'll start the hour five minutes early, sometimes five minutes late. And it's never predictable, either, they could be early for a few days, then late for a week. Why this is is anybody's guess. Maybe it's the laziness that's epidemic in communist countries. Nothing gets done right, nothing gets done on time, a lot of it never gets done at all. Everybody has a guaranteed job and guaranteed pay, so nobody feels the need to perform. I'm sure that Seeing Eye Dog can provide website links talking about the snuffing out of initiative under communism.

Poppy Bush starts the war on drugs, and the Bush crime family invests
in private prisons, knowing damn well the public ones will be
overflowing soon enough.

Then you have the Haliburton Detention centers:
<http://www.halliburton.com/default/main/halliburton/eng/news/source_files/news.jsp?newsur
l=/default/main/halliburton/eng/news/source_files/press_release/2006/kbrnws_012406.html>
"The contract, which is effective immediately, provides for
establishing temporary detention and processing capabilities to augment
existing ICE Detention and Removal Operations (DRO) Program facilities
in the event of an emergency influx of immigrants into the U.S., or to
support the rapid development of new programs. The contingency support
contract provides for planning and, if required, initiation of specific
engineering, construction and logistics support tasks to establish,
operate and maintain one or more expansion facilities."

In the private sector, if you contract with a company that fucks up,
you don't give them another contract at the very least, and more often
than not, you sue the shit heads. With Shrub, Haliburton keeps getting
more no-bid contracts.

Wrong web site, Sweetheart.

''P&O is the parent company of P&O Ports North America, which leases
terminals for the import and export and loading and unloading and
security of cargo in 21 ports, 11 on the East Coast, ranging from
Portland, Maine to Miami, Florida, and 10 on the Gulf Coast, from
Gulfport, Miss., to Corpus Christi, Texas, according to the company's
Web site.''

And yet again my point is that the publishers of the Encyclopedia can
be presumed to hire competent researchers schooled in specialities.
You cannot make that same asusmption about the legions of Wikipedia
posters. To the extent that those who send information to Wikipedia
copy it directly from vetted authors then the information on that
website can be accurate. Unfortunately we have no idea who is posting
nor do we have any idea what their credentials are. At best I think
you could say that the information on Wikipedia is of average accuracy.

I don't see where there would be a problem with information on Taiwan
independence, Falun Gong, etc., as long as the authors described the
issue accurately and as free of bias as possible. Since you raised the
specific questions, are you saying those issues should not be included
in an information resource? If not, why.

IF this actually happened it shows how unreliable Wikipedia is as a
source of informaton with a minimum of bias.

There is no corroboration unless that wacko J. Riley can produce a
credible source. It is nothing more than unfounded rumor that
interestingly enough does not appear to be given much credence by
reputable news organizations and their journalists.

It's happened before. They can tell by the magnetic orientation of particles in lake bottoms.. If I remember correctly, some lake in Africa had evidence of a half dozen magnetic pole changes.

Either the core turns, or the shell turns around the core. No one knows why. It may be precession gone rampant, a huge passing comet or some other body or something entirely different.

Ancient texts mention the Sun rising from the wrong direction. There may be truth in that.

Core change, versus crust change, is discussed here:

I am aware of the magnetic pole reversals.

The geographic pole reversal would cause other tremendous earth
environmental changes on a scale that I expect people and most life
would not survive it.

That old tv commercial,,, What kind of motor oil are you using,Earl?
[motol oil is motor oil!]
Coffee is Coffee,only if it is loaded with Caffein.
Do y'all know what happens to the Caffeine they take out of Coffee to make it decaffenated coffee? I know.Do you? By the way,they dont take all of the Caffeine out of decaffenated coffee.
I can't stand decaffenated coffee.

y'all might be interested in scrolling down at
www.homelandsecurityus.com and read the article,Bullet Points on the
Proposed Ports Transfer.

Part of the article says,The U.S.has 361 ports on our 95,000 mile
shoreline servicing 7500 commercial ships that make over 50,000 port
calls.

Five Ports,six,eight,ten,a dozen Ports,twenty one Ports,,,, I am telling
y'all that is only a start for Crooked U.S.fed govt (dont y'all see by
now how U.S.fed govt "works"? What happened to,A Government of, By The
People,Of The People,For The People?) selling U.S.A.down the River to
the u.n.and the bilderbergers and big money people and big corporations
and foreign govts.Just y'all watch and SEE.Every little once in a while
we see how those Crooked U.S.fed govt B...ARDS!!!! are selling America
down the RIVER.

I've always been worried about unintended audiences (ie foreigners) listening to US kook broadcasts and mistakenly thinking that the kooks are somehow endorsed by the US govt or even worse that they are official US govt broadcasts. Someday, some US politician is going to be told by an important official in a vital part of the world that the US govt endorses some extreme stand against said part of the world expressed by US kook broadcasters (like preachers saying that Islam is an evil religion). Why? Because it's on a radio station licensed by the US govt, of course.

The US is virtually unique in the world in that the central govt does NOT control all broadcast media tightly and does NOT have an official state broadcaster. Anybody can say practically whatever they want on a govt licensed broadcast station within a few broad limits, if they're willing to pay for it. In most of the rest of the world, including Europe, that is simply inconcievable. I don't expect officials in say Iran or China to understand the fine differences between US govt licensing of a station and paid programming by non-govt entities on said station. That difference could cost the US dearly in the future, not just with leaders but with public opinion in places that are already predisposed to view the US unfavorably.

I gave my DX-440 to a neighbor immigrant family several years ago.
AFAIK, they still use it to listen to broadcasts from their homeland. I
got that radio for Christmas in 1990. I hope my Degen 1102 lasts 15
years. Hell, even my Yaesu FRG-8800 has needed repair several times over
the six years I've had it (it is currently out of commission again with
problems that I can't afford to fix).

I remember listening to RHC at the top of the hour one night last
summer. It sounded like a tape was being played backwards. Then there
was silence for several minutes before the real broadcast arrived.

It's probably an ongoing thing with him. He gets short of money, he gets in another "accident" and gets another LARGE insurance settlement. It's nice "work" if you can get it. It sure enables him to keep turning the knobs all day.

He's just a bitter old man. He put all his faith in the student movement of the 60s and 40 years later capitalism is still here while the New Left is reduced to a few small pockets of aging boomers and a handful of deluded twentysomethings. It must be REALLY painful to realize that he is pushing 60-TWICE the age of people who his generation said they would never trust. 40 was a big milestone of his generation-they became their parents!-but now they're SIXTY and wondering why the govt can't afford to support their retirements in style with Social Security. They never planned for the future-the future was THEIRS to conquer, THEY would make it a glorious utopia! But now they're old and broke and bitter. And capitalism is still here.

I doubt he's THAT dangerous. He'll simply stew over his failure (and his generation's failure) to bring about utopia-for the next couple of decades. He'll die bitter and forgotten, and the world will spin on without him. Living well is truly the best revenge. For 35-40 years David Rickets has expected glorious revolution and a new world. And he will die disappointed. Just like all the kook broadcasters on SW who predict that Jesus will return, or the world as we know it will soon end.

I may be wrong, but I suspect you're underestimating the intelligence of those foreign officials. No slight to you or anything, but I suspect that most of them are quite a bit more sophisticated than we might suspect. Especially the higher level leaders as some of them have probably been to the US at some point or another. So they probably understand the concept of non state owned enterprises. But the big thing is that they don't endorse freedom because it is a threat to their monopoly on power.

I do agree though that the US is unique in that you can pretty much host your own show as long as you can foot the bill. That's rare when you consider that in a lot of nations, the broadcasting corporations are state owned and only in a number of Western nations are there alternative broadcasts.

do I *really* need to point out the name of this NG to the political posters? it's "rec.radio.SHORTWAVE", NOT rec.POLITICS! Please find another NG to post your political commentary to; readers of this NG come here read/learn about shortwave related stuff, not politics OR listen to the more childish among you to constantly berate & pick on each other. Grow up people.

Apples and oranges.

No question that the way the Britannica works generates a predictibly high bar for gross errors, but per the study published in Nature it's not perfect. It's also on shakey financial grounds, the last time I heard.

Britannica does some things wonderfully, but Wikipedia has done some things that no established media was able to do.

Wikipedia can cover complex curent events in a way that no newspaper or TV was can. Withing hours of the storm a page on Katrina was started and the damage and the recovery started to develop. No single group of "experts" could have assempled these pages. It became the most accurate resource available, anywahere, and became a resource for newspapers, TV, and pople looking to get or provide help. Was the information 100% accurate? Of course not. Was there any better collection of information? No.

http://en.wikipedia.org/wiki/Hurricane_Katrina

Properly used, Wikipedia a wonderful resource andn something as new and radical a the printing press was, back in the day.

The discussion tab on an article is, to me, frequently the most interesting page on an entry. I can learn all sides of a controversial issue, quickly.

Perfection is the enemy of the good. Don't let the people that want do destry good information sources destry WIkipedia. Wikipedia will evolve to address it's shorcommings and the attacks.

Anyone that watches to TV news as it exists in the USA without gagging has no business criticizing Wikipedia.

Another one of Radiomarts jokes? He says it has the rare Collins PTO. He says it's a Motorola but it has a Capehart tag. He says it has been thourghally gone through and professionally restored by none other than himself. He says it's up to Rick Mish's standards but yet the frame has a nice bow to it. You can get it for only 1995.00. Any takers?

Hi all!

First, please excuse me for my bad English :)

Does any one have link(s) to papers or referates about gwen (ground wave emergency network). I found some links trying google but with no good details.

If someone have paper on hard-drive too, please send it to my adress hgkrm@yahoo.com

Thanx a lot!

73!

Source record: 65145

The liberties of a people never were, nor ever will be, secure, when the transactions of their rulers may be concealed from them.

Is life so dear or peace so sweet as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others may take, but as for me, give me liberty, or give me death

Guard with jealous attention the public liberty. Suspect everyone who approaches that jewel. Unfortunately, nothing will preserve it but downright force. Whenever you give up that force, you are inevitably ruined.

4744. Give me liberty or give me death speech

Give Me Liberty Or Give Me Death
Patrick Henry, March 23, 1775.

No man thinks more highly than I do of the patriotism, as well as abilities, of the very worthy gentlemen who have just addressed the House. But different men often see the same subject in different lights; and, therefore, I hope it will not be thought disrespectful to those gentlemen if, entertaining as I do opinions of a character very opposite to theirs, I shall speak forth my sentiments freely and without reserve. This is no time for ceremony. The questing before the House is one of awful moment to this country. For my own part, I consider it as nothing less than a question of freedom or slavery; and in proportion to the magnitude of the subject ought to be the freedom of the debate. It is only in this way that we can hope to arrive at truth, and fulfill the great responsibility which we hold to God and our country. Should I keep back my opinions at such a time, through fear of giving offense, I should consider myself as guilty of treason towards my country, and of an act of disloyalty toward the Majesty of Heaven, which I revere above all earthly kings.

Mr. President, it is natural to man to indulge in the illusions of hope. We are apt to shut our eyes against a painful truth, and listen to the song of that siren till she transforms us into beasts. Is this the part of wise men, engaged in a great and arduous struggle for liberty? Are we disposed to be of the number of those who, having eyes, see not, and, having ears, hear not, the things which so nearly concern their temporal salvation? For my part, whatever anguish of spirit it may cost, I am willing to know the whole truth; to know the worst, and to provide for it.

I have but one lamp by which my feet are guided, and that is the lamp of experience. I know of no way of judging of the future but by the past. And judging by the past, I wish to know what there has been in the conduct of the British ministry for the last ten years to justify those hopes with which gentlemen have been pleased to solace themselves and the House. Is it that insidious smile with which our petition has been lately received? Trust it not, sir; it will prove a snare to your feet. Suffer not yourselves to be betrayed with a kiss. Ask yourselves how this gracious reception of our petition comports with those warlike preparations which cover our waters and darken our land. Are fleets and armies necessary to a work of love and reconciliation? Have we shown ourselves so unwilling to be reconciled that force must be called in to win back our love? Let us not deceive ourselves, sir. These are the implements of war and subjugation; the last arguments to which kings resort. I ask gentlemen, sir, what means this martial array, if its purpose be not to force us to submission? Can gentlemen assign any other possible motive for it? Has Great Britain any enemy, in this quarter of the world, to call for all this accumulation of navies and armies? No, sir, she

has none. They are meant for us: they can be meant for no other. They are sent over to bind and rivet upon us those chains which the British ministry have been so long forging. And what have we to oppose to them? Shall we try argument? Sir, we have been trying that for the last ten years. Have we anything new to offer upon the subject? Nothing. We have held the subject up in every light of which it is capable; but it has been all in vain. Shall we resort to entreaty and humble supplication? What terms shall we find which have not been already exhausted? Let us not, I beseech you, sir, deceive ourselves. Sir, we have done everything that could be done to avert the storm which is now coming on. We have petitioned; we have remonstrated; we have supplicated; we have prostrated ourselves before the throne, and have implored its interposition to arrest the tyrannical hands of the ministry and Parliament. Our petitions have been slighted; our remonstrances have produced additional violence and insult; our supplications have been disregarded; and we have been spurned, with contempt, from the foot of the throne! In vain, after these things, may we indulge the fond hope of peace and reconciliation. There is no longer any room for hope. If we wish to be free-- if we mean to preserve inviolate those inestimable privileges for which we have been so long contending--if we mean not basely to abandon the noble struggle in which we have been so long engaged, and which we have pledged ourselves never to abandon until the glorious object of our contest shall be obtained--we must fight! I repeat it, sir, we must fight! An appeal to arms and to the God of hosts is all that is left us!

They tell us, sir, that we are weak; unable to cope with so formidable an adversary. But when shall we be stronger? Will it be the next week, or the next year? Will it be when we are totally disarmed, and when a British guard shall be stationed in every house? Shall we gather strength by irresolution and inaction? Shall we acquire the means of effectual resistance by lying supinely on our backs and hugging the delusive phantom of hope, until our enemies shall have bound us hand and foot? Sir, we are not weak if we make a proper use of those means which the God of nature hath placed in our power. The millions of people, armed in the holy cause of liberty, and in such a country as that which we possess, are invincible by any force which our enemy can send against us. Besides, sir, we shall not fight our battles alone. There is a just God who presides over the destinies of nations, and who will raise up friends to fight our battles for us. The battle, sir, is not to the strong alone; it is to the vigilant, the active, the brave. Besides, sir, we have no election. If we were base enough to desire it, it is now too late to retire from the contest. There is no retreat but in submission and slavery! Our chains are forged! Their clanking may be heard on the plains of Boston! The war is inevitable--and let it come! I repeat it, sir, let it come.

It is in vain, sir, to extenuate the matter. Gentlemen may cry, Peace, Peace-- but there is no peace. The war is actually begun! The next gale that sweeps from the north will bring to our ears the clash of resounding arms! Our brethren are already in the field! Why stand we here idle? What is it that gentlemen wish? What would they have? Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others may take; but as for me, give me

liberty or give me death!

Just depends on what you specify when you buy the BNC connector. Just don't try to mate a 75 Ohm BNC with a 50 Ohm BNC- same holds true for 75/50 type N.
We recently built a high power 50-->75 Ohm matching section for a CA company. The unit had warnings that the output was 75 Ohm connector (their choice). Got a call that they had destroyed the fingers on the 75 Ohm side by screwing in a 50 Ohm mate. Very expensive mistake for them.

Dear Michael,

If you join the 7600GR group on Yahoo and then go here:

http://groups.yahoo.com/group/7600GR/files/

you should find anything you need.

Best,

Joe

P.S. There is also a 7600G group on Yahoo which you may want to join as
well.

This seems to happen to a lot of news groups. The political comments
become more plentiful than the supposed subject matter of the group.
Perhaps, here, it is because you can only say so much about baluns,
wire size, pirates, Radio Mart's outrageousness, or whatever. Still,
you'd think that talk radio, Fox News, the Drudge Report etc. would be
enough for most people. Maybe their Two Minues Hate spills over into
newsgroup activities, I dunno. I saw another perfectly fine group,
misc.writing.screenplays taken over by political rants, and the
regulars broke off and formed a moderated version of the group to
exclude the ranting. Short of that, filters will exclude much of the
soap boxing. I'm not sure that there really is a solution, beyond
forming a moderated group.

Ah well, I need to turn on Air America Radio now...

Dear Michael,

Here's an even better page for you:

http://stephan.win31.de/sony76-1.htm#ICF-SW7600G

Scroll all the way down and you will find direct links to the manuals.
You will also find some links for interesting "tips" about the radio.

Right after I posted my reply to you the "wheels," which move somewhat
slowly, "clicked into gear" and I remembered this site which, by the
way, is in Germany.

I hope this will help you. (But please join the 7600GR (and/or G group)
on Yahoo, if you have not already done so, where you will find a lot of
good information regarding these radios which I regard as the finest
small SW portables ever made - I own two '7600G models and five '7600GR
models along with five AN-LP1 antennas.)

Best,

Joe

Hi Lisa,

The shortwave broadcast universe is shrinking. Stations -- even VOA (sniff) are cutting back, leaving good frequencies to others. I do not mind much of it, although, as a Christian, I find that Christian radio can be tedious at times. However, it appears that the Alex Joneses of the airwaves have found lots of easily led listeners.

Every village has an idiot or three banging on pots and pans and proclaiming the end of the world because of sinister conspiracies, global warming, flouridated water, the Federal Reserve Bank, and the Bilderburgers. Take David. Please. Or just step over his posts as you would cowpies in a pasture.

All best,

Ed

I stand by my comment.

Even the article you pasted in contains obvious factual errors.

For example, they're now claiming there was a day and a half delay from
when the incident happened until the media was notified.

The Corpus Christi World Guardian doesn't count. There is a procedure
where the office of the VP requests a ''Wire'' conference call from
the WH Communications Office. This was not done.

Where in the Constitution does it say that the Supreme Court tells a
state to stop counting votes?

Where in the Constitution does it say that electronic elections with
impossible-to-verify vote counts are legal?

David, The Corpus Christi Caller-Times sent the story to the AP.

You and Capitol Hill Blue are grasping at straws that aren't there to
try to inflate the case.

David said, with absolute candor:

>Well, I'm way past 46.<

Oh, and, by the way, you act about a third that age - like a wet-behind-the-ears kid with excess testosterone and a scattershot sense of direction.

>If saomeone tells me they love me I ask back ''would you die for me?'' If they say yes, it proves my original point, doesn't it? <

You mix up things that do not necessarily apply. Love is a term of strong affection - that's all, as far as it goes. To love a thing does not mean one would die for it - it could mean that one is willing to sacrifice time and expense because its preservation more than compensates for the sacrifice, but that is far different.

As far your definition of love as being willing to die for someone or something, that is bogus on so many levels it stinks. Love is not self-hatred or self-destructiveness. A person may be willing to die for someone else out of love, but a sane person is going to be willing to do so only if it necessary. Yes, I would die to rescue my family members from a bona fide deadly situation - because I value their lives immensely - but I'm not going to jump off a cliff because a beloved person tells me to do it.

No person who asks you to do this is worth loving.

If that is your definition of love, then I unhesitatingly will say that you are at least neurotic, maybe psychotic. Your point is that of a seriously ill person. Just like my dead pal. Who was not, despite his proclamations, a genius.

> You're the one who said ''morals'' as if you're some kind of high and mighty deity. Then, you offer ''pity''. Listen up, Pal; you ain't Jesus.<

Your perspective is severely warped, old man, if this is what you think I meant. The discussion of morals does not imply to any normal human that the discussors consider themselves to be perfect. Maybe this is how you see *yourself*, and can no longer fathom a conversation from a routine point of view. More likely, you're just using a silly argument to unsuccessfully make your point. If you want to win a debate, you better drag out some better logic than this.

That is not the SOP. They essentially leaked the story in an attempt
to have a soft rollout.

One of the basic tenets of our form of government is transparency. If
it can't stand the light of day there's probably something amiss.

Unfortunately Wikipedia is being held up as a consistently accurate
source for information and it is clearly not.

The financial status of EB is unfortunate, but pretty much irrelevant
to the discussion of whether Wikipedia is a reasonable substitute. It
clearly is not.

>

I hardly see how an website open for one and all to post on qualifies
as a substitute for TV news like CNN can cover the issue. There is too
much irrelevant noise being posted to a site like that.

> Withing hours of the storm a page on Katrina was
> started and the damage and the recovery started to develop.

That's a small achievement...look at the coverage CNN, WSJ and numerous
other media provided.

No, it is another source of information that is at best partly filtered
of marginally useful and sometimes distracting information. At times
it can be little more than a data dump.

It wasn't something to do with the submarine fleet, it was a digital
packet radio network, for either FEMA or the DOD, that ran in the Lowfer
band, around 170 kHz with fairly high (10 kw?) power. The idea was that
it was a survivable network where they could put a bunch of packet relay
tranceivers all across the country in rural areas.

It ran into the NIMBY factor and the Peace Movement. The thought that
your town out in the sticks could become the target of a nuclear attack
just because they put up a tower and a shed full of transmitters caused
a lot of opposition.

Too slow (bits per second) for the cost was probably a factor.

The backwards tape process is/was used to send a program to another site
where it was recorded. It was sent backwards so the tape didn't have to
be rewound before playing it on the air.

David strikes me as "Turn On, Tune In, Drop Out" type. The hippies were
a whole other movement from the student activists. They didn't trust
each other. That's the thing about the '60s that a lot of people don't
understand. It was many many movements, from the Christian Hippies to
the Young Americans for Freedom.

>deluded twentysomethings. It must be REALLY painful to realize that he

Yeah, it's a waste of time. Certain individuals believe
it's their duty to inform others of the rightness
of their beliefs vs. others in r.r.s. Most of the off
topic subjects originate from a few people, and
if you spend enough time in r.r.s, you realize their
signal to noise ratio is pretty bad, so you shouldn't
feel bad in killfiling them.

I personally don't killfile many people; this is the
second newsgroup in which I've done so. However,
after realizing that I zap about 90% of their posts
without even reading them, I've finally decided that
some folks like Telamon have the right of it with
these people.

>People who go around hating have no self respect for themselves.(leads to depression too) politicians dont count,of course,they hate everybody

but themselves.(you ever look up before what the term/word politics really means?) I am not depressed,I am and always have been sort of a happy go lucky guy.
cuhulin <

Then this question, cuhulin - Why do you seem to hate the Arab world so much that you think it appropriate it incinerate it with nuclear weapons? It is not every person there (be he/she Muslim, Jew, Christian or other) who wants to bring down your way of life, yet you have stated more than once that you would support this solution...that seems a position of hatred to me.

I am not arguing with either that statement or your present post - it just strikes me that the two positions are incongruous.

It's got nice sound, but it's main drawback is that
it's a single conversion radio, so beware of images.
The more recent version seems to have fixed some
of the stability issues, which was another big
problem in years past.

Isn't the Grundig 350 SL radios that is suppose to be the best one?
Check your local area Radio Shack stores.Not long ago,I read that Radio
Shack is going to close down a lot of their stores.You might get a good
deal on a Grundig 350 SL.I think I saw one of those radios in a local
Jackson Radio Shack store about five months ago.I dont remember what the
price was though.

I will not respond to two certain people that post here due to the fact
that they advocate the USA government overthrow. I don't need any
trouble added to my life.

Other people are kill filed due to foul language and still others
because they just like to pointlessly argue about things on and off
topic.

Nobody needs a daily dose of negative opinion in their life and I come
here to read news and information or answer questions if I have an
answer to them.

Some people have an on-line persona but I don't. I would speak to you in
person the same way that I post and just like I would not have anything
to do with some people in person I don't have anything to do with them
in the news group.

These past months have been good for central and south Americas to
California on 6, 9 and 11 MHz bands. The 4 MHz band (4750-5060 KHz) has
been good also.

Us folks on the west coast generally have good reception of Asia and the
pacific region.

Family Radio out of Okeechobee, Florida is a real power house with
strong signal most days on most any band. Family radio is nice in that
they spend time actually reading the Bible instead of some guy
preaching his take on it.

Yep, you sure can't go mixing different impedance connectors. One
parameter that determines the impedance of the connector is the spacing
of the center to outer conductor so even if they look the same they
will not mate properly and stuff gets broken.

There are very small differences in contact dimensions you need to
measure with a micrometer in the microwave region so connectors don't
get busted and you need to use a torque wrench or the performance will
not be to specifications. Reflection measurements are very picky about
using the right torque on connectors.

It always pays to look closely at the connector before screwing
something together in case a connector has already been ruined as
another lesson learned in the lab.

Sounds like a good choice. Use its whip or a short wire external
antenna. A big antenna will generate strong signals on most bands and
she will see plenty of images.

A reasonable person applying common sense would conclude that an
electronic vote that cannot be verified by a hand count is
insufficient and fails to meet minimal requirements.

Iraq gets hand-counted paper ballots, we get Diebold's proprietary
software.

I purchased a Tecsun BCL 3000 last fall which is much the same as the Eton 350 Deluxe except it has a smaller speaker. I'm very happy with it, although it's used more for AM DX. It's compact enough to leave on the kitchen table and it gets used daily.

Today I saw the red Eton 350 Deluxe model on sale at The Source for $129 CDN and the Grundig 350 selling for $99 CDN.

There is a jewish double standard going on with Prussian Blue. Look at nigger Ice Cube and the anti-white rap songs he made. He recorded hate speech against whites, and the album was released by a jewish owned record company. Then Ice Cube was warmly taken in by jewish controlled hollywood, and made movies such as Three Kings, XXX 2 and Ghosts of Mars.

And of course, there are jewish made movies in Hollywood that are racist against whites. Look at recently released movies North Country, Last Holiday starring Queen Latifah, Glory Road, and The Man starring Samual L Jackson, all of which are movies that were produced, directed and written by jews and which are racist against whites. (For a great article on how Glory Road and Last Holiday are racist, go here: http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=20907) And here are some other anti-white movies:

- WALKING TALL: Buford T. Pusser was a hero to a generation of white Americans in the 1970's. Now, in yet another stupid, asinine remake, the character is being played by a black man! Can this politically correct world get any more imbecelic? Let's do another remake of "Shaft" and make the protagonist a white guy in a tweed suit and Afro cut. Was this really a surprise to anyone of us though? I remember seeing a commercial for this movie. "Da Rock" was yelling at some guy asking where he "got the drugs" and guy he was yelling at said at some casino. Wouldnt you know it, all the "bad guys" that they showed were White! Especially the main evil one. Whats funny is how they just had to mention "based on a true story" near the end. Whats gonna end up happening is that lemmings are gonna think that the movie version is how it really happened. Jews love to make movies where there's this

strong negro main character with probably some "white buddy" who's a lunatic beating up white criminals while the negro main character gets all sorts of white women in his arms and the "white buddy" tries to act smooth and cool and gets rejected by everyone. What's even more sad is the fact that White men will probably identify more with the negro main characters and think "yeah that White guy is such a loser!" while of course we all know what White women will do. This is how jews spread their propaganda.

- MAN ON FIRE: Little blue eyed blonde girl and her blonde mother are protected and saved by strong black man. No non-jewish white man to be found. The semitic moral of the story is that White men are pathetic and weak and niggers are strong and mighty and always "do the right thing" and can do no wrong and that White men are so pathetic that they can't even take care of their families so that the nigger has to step in.This movie is a jew propaganda piece to make the noble nigger the idol of white women.

- I ROBOT: A black guy fights off legions of evil white robots (with blue eyes) created by a white guy. The black guy also has a white female love interest, hmmm... beating up and killing hundreds of robots meant to look like white males, while doing love scenes with a white female. Consequently, this movie was also made by jews in Hollywood. Could the jews have some sort of agenda to make whites look bad while making blacks look good? And could Hollywood jews be attempting to cultivate animosity towards white males? Looks like it. Everybody at the top involved with this film is a fucking jew. It is jewish "art" through and through. Avoid it like the propaganda plague it is. Do not waste your time or money with this jew filth, jew sewage, and jew crap. I wonder what the film would of been like if they had made the i,robot's in the image of niggers and the good guy was white.

Blacks are OVERWHELMINGLY portrayed as smart/sexy/courageous -- everything that is the opposite of how non-jewish white males are defamed.

Look at all the commercial ads denigrating non-jewish white males, typically portraying them as fat/old/bald/unmasculine/unhip .... ie., asexual. When's the last time you saw a black male being portrayed as such, or even better, when's the last time you a jewish character being portrayed that way? The most general theme in Hollywood is macho/upright/brave black male, white female with the black male, and stupid/unhip/asexual/criminal/insane non-jewish white male.

I have been noticing that in many TV commercials there is frequent stereo-typing of non-jewish white male roles. If there are male and female characters in "real life" situations, the non-jewish white male guy is frequently portrayed as immature, ignorant, goofy, passive and/or lacking in self control or social skills. The female character's role is consistently controlling, mature and responsible. If the commercial has Black and white roles, the non-jewish white guy is submissive, immature, and inept. The Black character will act in a

mature, authoritative and controlling. The non-jewish white male character will often be of lower social/professional status than the character portrayed by the Black male (who will invariably have a deeper, more manly voice).

Guideline #1: Watch the White Characters.

For the most part, the only time Whites are portrayed as good or smart is when they engage in race-mixing, homosexuality, "minority" boot-licking, or some other anti-White practice. The more a White person toes the liberal/PC/Zionist line, the more positively he or she will be presented. Also, overtly Aryan-looking males (those with blond hair and blue eyes), will almost always be portrayed as evil or foolish or both. This goes double for Aryan men from the South and especially from Germany. Blond-haired, blue-eyed women are simply treated as unintelligent sex objects.

Guideline #2: Watch the non-White Characters.

Non-Whites, especially blacks, are Hollywood's new heroes. The "good guy" will almost always be a "minority", while the "bad guy" is now White. Even petty criminals, such as car thieves, are now played by White actors. Hollywood wants us to swallow the notion that Blacks and other non-Whites simply don't commit crimes. In the real world, how many carjackers have blond hair and blue eyes? Do you fear for your safety when you're in a White neighborhood? You should, unless our media masters are lying to us.

Guideline #3: Watch the Credits.... Carefully.

Both at the beginning and end of any major movie, you'll notice that the directors and producers have Jewish names. Look closely and you'll see the same thing about the casting agents. This means that the main facets of Hollywood production are directly controlled by Jews. It should come as no surprise, therefore, that a clearly pro-liberal, pro-Zionist, politically correct, anti-White bias is evident in most of today's films and television shows.

And even famous actor James Woods (correctly) mentions it:

"In this politically correct era, the middle-aged heterosexual white guy gets to play one part, he gets to play the asshole in the suit," Woods grouses. "That's the only part they make anymore. That's the only part there is for a white heterosexual guy. Sorry, but it's the truth. Even when he's the hero now: Like Tom Cruise in 'War of the Worlds,' he's the hero, right? Steven Spielberg, Tom Cruise, H.G. Wells, how do you top that? They do a remarkable job of how the make the movie and so on, but he has to be a father who's a lousy parent, a terrible ex-husband, blah blah blah."

We all know Hollywood is controlled by jews. 99% of the producers, scriptwriters and actors are jews. And most Hollywood movies, coincidentally, every white man in today's movies is either a jerk or a

clutz. Negroes are almost always portrayed as noble, kindhearted and spiritual and there's at least one interracial relationship between negro males and white females.

4834. Re: (OT) The UAE is the least of the Port of Miami's terrorism concerns

Newsgroup: rec.radio.shortwave
Date: 2006-02-27 23:07:40 UTC
From: SeeingEyeD0g <looking@u.org>
Message-ID: <12071ktoeqm6jcd@corp.supernews.com>
Source record: 65233

When the Deputy Director of the Port of Miami, Khalid Salahuddin, was asked about the purchase of his port by a state-owned company from the United Arab Emirates (UAE) , he defended the transaction. He stated, "They are not buying the Port of Miami. They are buying part of one of the operators at the port."
...
Before becoming an 'Orthodox Muslim,' Khalid Salahuddin was a member of the Nation of Islam, Louis Farrakhan's notoriously anti-Semitic organization. Today, he heads his own mosque in North Miami, Masjid Al-Ikhlas.

As a leader in the South Florida Islamic community, Salahuddin has traveled circles that leave little to be encouraged about. Indeed, his ties to radical Islam are many.

4835. (ot) They are as Muslim as Hitler was Buddhist

Newsgroup: rec.radio.shortwave
Date: 2006-02-27 23:10:02 UTC
From: SeeingEyeD0g <looking@u.org>
Message-ID: <12071pct89capf0@corp.supernews.com>
Source record: 65234

They are as Muslim as Hitler was Buddhist (the faith that saw its swastika twisted by the Nazis)
...
At present we are being led to believe that the "Muslim world" (keep in mind, the overwhelming majority of Muslims are not allowed to speak at all unless it serves the purposes of the ten-cent general, overly powerful political hack, or fatwa-addicted cleric that has the nation in which he or she lives locked in a despotism) is speaking out against the cartoons because of the offense to Islam. This is giving certain apologists the opportunity to mention Iraq, Palestine, and other supposed crimes of the planet's non-Muslims against the faith.

Yet the Chinese Communist Party - a regime that specifically places itself in Muhammed's place as Allah's last prophet, has occupied a Muslim nation for over 56 years (East Turkestan) , and has killed over 210,000 Muslims within that occupied nation through open-air nuclear tests (yes, you read that right) - gets a pass. Osama Bin Laden and his fellow terrorists have demanded the Israelis evacuate Palestine, the Americans leave Iraq, and the Spanish abandon Spain, but they have said absolutely nothing about Communist China's atrocities - which also include shooting political prisoners, razing mosques to the ground, and banning all East Turkestani children from attending any mosques still standing.

So why would a bunch of violent killers claiming they murder in Islam's name try to remind everyone of the medieval Crusades while staying silent on an occupation during which more Muslims have died than during all eight Crusades combined?

If your answer had something to do with the Communists' aid to terrorists, you're right.
...
http://westernstandard.blogs.com/shotgun/2006/02/on_the_cartoons.html

Islamic terrorists have carried out more than 4340 deadly terror attacks since 9/11. www.TheReligionOfPeace.com

So much for modern technology. Even some third world countries have
digital transfers. I bet that they're still using 1960s Soviet tape
players-with the original tapes. ;)

I don't view SW radio as a "hobby" but a vital source of info. If/when the fascist dictatorship comes, I'll turn down my Degen, hide it under a towel, and keep listening to real news. Meanwhile, YOU will be sad because XM pulled the plug on BBCWS at the behest of the Bushies. Hey, in Nepal the king shut down the BBC FM station in Kathmandu, what's to stop King George from pulling the plug on your satellite feed? Here's something you won't hear on satellite radio: at Gitmo hunger strikers are being force fed with a tube down their nose for food and a tube down their throat to keep them from barfing up said food. While in forcible restraint positions. Even considering the source for that tidbit (Radio Havana) it makes sense given the abuses at Abu Ghraib. By the way, dozens more pics of that horror exist, but nobody bothered to tell David Rickets so he could make hay out of it on RRS, because David Rickets wasn't listening to SW. Too bad for David Rickets. Maybe he'll see the dial light, but I wouldn't count on it.

The wind up Grundig FR200 radios are nice, but I had two that both developed problems with the volume control. After a few months of daily use at the office, the volume control became very noisy. I ended up returning both radios. It's too bad they couldn't be built with slightly better parts. They are just the right size to keep at work, cute as a button, and they are very good on batteries.

I guess most people buy these radios and put them away for an emergency, They will rarely come across this problem because their radios will never see extended use..

I ended up getting a Degen DE1107 to use at work. I was happy with it until the LCD clock stopped working out of the blue. I'm waiting for a warranty replacement unit now. Apart from the clock going south, the radio is very good. The domestic version being sold in the US is the Kaito KA1107. You may find this model interesting..

I won't, & eventually the off-topic posters will find an audience that cares to hear their views I'm sure, but I was hoping to bring more on-topic posts back to this NG as it appeared to be going asea there for a while . . .

Good points, thank you! Filtering does help a lot. It's just disappointing
to see so few on-topic posts some days . . .

hmmmmm, moderation . . .

On the subject of RS closing some shops, I talked to my local RS dude this morning on that very subject, hoping to get some inside info on some upcoming good deals (!); he said they're just gonna shift inventory from one area store to another and close down the least profitable ones (like his, sadly), and he really doesn't expect there to be any "steals" per se in this go round, but he promised to keep me in mind should he be wrong! : }

I'm not flaming you moron, just responding to your posts, where you STICK YOU BIG NOSE INTO A CONVERSATION, that you don't know anything about.

I don't need anyone's permission to tell you what a stupid fuck you are. That's obvious!

Apparently you have a serious comprehension problem, so let me reiterate.
GO FUCK YOURSELF BUCKO! And if you were standing in front of me, I'd be just as blunt and honest with you as I am now. The ONLY ONE WHO HAS BEEN CONFRONTATIONAL IS YOU. Go back and read your own posts. Now fuck off!

Bye Byeeeeeeeeee

So,if you want emergency communications up to a distance of about three miles,just fly a kite.Jigging a kite up and down could be something like Morse Code or Semiphore and using binoculars or telescopes for more than three miles viewing.Perhaps the Indians had it figured out first with their smoke signals and tom tom drums.How come the old Railroad tracks couldn't have been used for electronic communicating? Send signals on one side of the tracks,receive signals on the other side of the tracks,pieces of wire could have been used to bridge across the open gaps of the rails.

Electrnic voting,deleted just as easy as deleting spams out of email inboxes,,, (I guess it could be called,hacking votes) and phoney votes added just as easy as emailing to yourself in your own email inboxes.Click,Click,Click,,,,,,,,,

Even some people using Palm Pilots did it to some electronic voting machines.I know,I know,,,, some electronic voting machines also presented pieces of paper (your "receipt Sir/Mam,Thank you and please show up again tomorrow and vote again and again and again.....) along with the electronic voting.Paper Votes and Paper Votes only and all collected propely and proerly counted is the only right way to vote.

I kill file on much more than just the author or "from" although there
is a long list of people over the years. Many of these people don't post
here any more but I leave them in there in case they come back.

I kill file on:
1. Certain cross posted news groups.
2. Certain off topics, curse words, names in subject header.
3. Anonymous news servers in the reference header.
4. Anonymous news servers in the organization header.
5. Anonymous news servers in the Message-ID header.
6. Certain other news groups in the Xref header.
7. Anonymous news servers in the path header.
8. Certain people in the from header.
9. Information in the path header.

#8 is a long list.

Scores add. Anything less then 0 is killed.

Most of the posts are killed everyday. I read about 30% of what is
posted on average these days. The news group has gotten much worse in
the last six months. Before last summer the average was around 50%. I
would have stopped reading the news group long ago If I had to wade
through all this crap everyday.

I recently picked up a red Eton S350DL (which appears to be an
upgraded version of the Grundig S350) on ebay for $110.79 total,
including shipping. There's one even now (item # 5863040259) listed
at $114.99 plus $12.99 shipping. They list at about $150.00.

Well, the preeminent Mr. Devoldere *does* have a *lot* of 160 experience, being one of the top two 160 guys in the world. Additionally, he is a renowned low band author and is recognized as the top low band propagation authority in the world. You, on the other hand, have no actual credentials or acceptance by others as a world class expert like Mr. Devoldere.

He *is* the world's recognized low band propagation expert.

You aint.

Quite delusional of you, you know...but please feel free to continue your quest to become a Legend in Your Own Mind...(and it does sorta tie in with your egotistical self-appointment as an "ace")

Thanks everybody for comments. I will probably change my mind ten times before I eventually buy anything. Seems like the Degen might be a likely candidate.

I found a pdf file from Phil that you might like to take a look at.

It's called "Phil's Portable radio guide" and has the kind of info to make a decision. You will be surprised what he finds to be the best radios. Maybe you will just have to buy another radio after reading this.

by giving the Congress and the states the power to make their own laws

all election system will have some degree of fraud be it a paper ballot
or an eletronic ballot

it is very simple as I have been willing to coceed since the date Bush
was selcted president , but i only make that statement with the caveate
that if things had gone Gores Way he would have been as selected

Yes I voted for GW Once for Gov twice for president, not BTW because I
thought he was the best person for the job but becuase I thought he was
the best person on the Ballot for the job. I also was casting a
deliberate vote for War with Iraq during Bushs term, aginast what I saw
as clinton gore refusaul to enforce the ceasefire agreement. My only
beef with GW over the war was he waited longer than he should have to
start it

Speaking of Shortwave radio, I hear someone on WWCR 3.215 says that
Hillary Clinton . . . ..

(All Joking aside)

If we'd just get rid of Bill Clinton As President, and elect a
Conservative Republican . . .

- So much for WWCR..

>From the BBC on 5.975 at 03:00 UTC

http://news.bbc.co.uk/2/hi/middle_east/4755706.stm

Iraq makes terror 'more likely'

People across the world overwhelmingly believe the war in Iraq has
increased the likelihood of terrorist attacks worldwide, a poll for the
BBC reveals.
Some 60% of people in 35 countries surveyed believe this is the case,
against just 12% who think terrorist attacks have become less likely.

no

but your reply show that you haven't grwn. saying that anyioe that
disagrees with has a mental porblem is the very essense of childishness

BTW such a stroke would have to have been far longer ago than last
week, but it would you using a brain to realize that

wake David a mind a terribel thing to waste

4886. Re: probably wasting my time, but . . .

I assume when people say they are going to recap an older radio,that means replacing the old capacitors with new capacitors.Is that right? What is involved with that,is that a simple sort of job to do for a dummie like me? All I know about repairing radios is checking for a wire that might have broken loose and cleaning up battery contacts.
cuhulin

4887. Re: Icom R75 With Kiwa Mods and Remote - SOLD!

no

your question shows however you are unwilling to grow up and reconize
that is possible to disagree

it is also shows you are stupid since if my vote for were stroke
induced it was a LOT longer ago than last week

If you was planning on at first spending about $100.00 for a Shortwave radio,I think it is hard to beat spending that amount of money for a new Sony 7600 GR radio.The best in it's class for the money.

Hmmmm, well, if given the option a second time, I probably wouldn't buy it for $100, even if the newer ones are more stable than the early model I picked up. The major plus is that it's quite sensitive. I don't particularly care for all of the images on this set. As far as this type of radio (analog w/digital readout) goes, I prefer my ol' Panasonic RF-2600 and 2900 (admittedly these two models, as well, suffer from some image problems). The S350 is excellent on batteries. By and large, the audio is pretty decent on the S350, although mine rarely remains stationary on a SW frequency for long. I do use the S350 a lot for FM listening, for which it's fairly decent.
This thing seems to have been designed for those who have some nostalgia for old portables like the two Panasonics mentioned above. Would an 11 year old go for it? I honestly don't have any idea. But all the best in making your decision.

Agreed. To name a few advantages of the '7600GR over the S350:
'7600GR provides single sideband and synchronous selectable sideband
reception. Memories. No drift. Direct frequency entry. Etc etc.

Warm water DOES expand. Really really warm water REALLY really expands.
We call it steam and it drives turbines for Webtv subscribers.

Water is it's densest at roughly 4 degrees C, below which it will expand
and above which point it will expand.

Porco Cane!

Why Bother Responding to Nazis?]

Some may wonder whether it makes sense to spend so much time and energy responding to the claims of someone who openly consorts with neo-Nazis, and whose agenda is so blatantly racist in nature. Though it would be nice not to have to respond to such silliness, the fact is, Taylor and his report have been cited approvingly by conservative columnists and talking heads, from Walter Williams, to David Horowitz, to the folks at the National Review, to Vanderbilt Law professor, Carol Swain.

What's more, with studies suggesting that white perceptions of black criminality play a prominent role in furthering racism, both attitudinally and institutionally (in terms of support for racially disparate and draconian crime policies), refuting this kind of foolishness carries with it important personal and policy implications as well.

However unappealing it may be to have to answer the racist claims of bigots and fascists, the fact remains that given the appeal of racist logic to so many, and given the strength of institutional racism as a defining force in American life, we can hardly afford the luxury of ignoring such positions, so as to "not give them legitimacy."

The sad fact is that racism already enjoys plenty of legitimacy, with or without a rebuttal. Ignoring this reality isn't likely to diminish its strength, but responding to it forcefully might, at the very least, dissuade impressionable minds from accepting the twisted logic offered by the racist right.

The Color of Deception

By Tim "WhiteMan" Wise

http://www.zmag.org/sustainers/content/2004-10/19wise.cfm

"A lie can travel half-way around the world while the truth is still pulling on its boots."

Although this truism was penned long before the Internet, there is little doubt but that in the modern era, it has become more prescient than its author could ever have imagined.

When it comes to fast-moving lies, few can top one that has been distributed by white supremacists for the past several years. It is probably the most popular piece of racist propaganda in existence today, and because it relies on official government data, it comes across as sober, intelligent social science, rather than as the compendium of nonsense it happens to be.

The screed to which I refer is "The Color of Crime: Race, Crime and Violence in America," by white nationalist, Jared Taylor. Taylor is the publisher of the racist magazine, American Renaissance, and host of an annual conference, which attracts open neo-Nazis as well as a gaggle of academicians who proclaim black genetic inferiority.

According to Taylor, there are several "facts" about crime that have been hidden from view by the civil rights community. Among them:

--Blacks are much more dangerous than whites as evidenced by higher crime rates;

--Black criminals usually choose white victims and are far more likely to victimize whites than whites are to victimize blacks (both for regular violent crimes and hate crimes);

--Black crime rates justify racial profiling, since it only makes sense to focus law enforcement attention on those who commit a disproportionate share of crime; and finally,

--The interracial crime data makes white fear of African Americans perfectly rational.

But a close examination of these arguments proves that Taylor and his followers are either statistically illiterate, or knowingly deceive for political effect.

First, as for the disproportionate rate of violent crime committed by blacks, economic conditions explain the difference with white crime rates.

According to several studies, when community and personal economic status is comparable between whites and blacks, there are no significant racial crime differences (1). In other words, the implicit message of Taylor's report--that blacks are dangerous because they are black--is insupportable.

Secondly, to claim that blacks are more dangerous than whites because of official crime rates, is to ignore that when it comes to everyday threats to personal well-being, whites far and away lead the pack in all kinds of destructive behaviors: corporate pollution, consumer fraud, violations of health and safety standards on the job, and launching wars on the basis of deceptive evidence, to name a few. Each year, far more people die because of corporate malfeasance, occupational health violations and pollution than all the street crime combined, let alone street crime committed by African Americans (2).

[Stoking Fears About Interracial Crime - A Look at How Nazis Do Math]

Next, Taylor claims that most victims of black violent crime are white, and thus, that blacks are violently targeting whites. Furthermore, since only a small share of the victims of white criminals are black (only 4.4 percent in 2002, for example), this means that blacks are far more of a threat to whites than vice-versa.

But there are several problems with these claims.

To begin with, the white victim totals in the Justice Department's victimization data include those termed Hispanic by the Census, since nine in ten Latino/as are considered racially white by government record-keepers. Since Latino/as tend to live closer to blacks than non-Hispanic whites, this means that many "white" victims of "black crime" are Latino/a, and that in any given year, the majority of black crime victims would be people of color, not whites.

But even if we compute the white totals as Taylor does, without breaking out Hispanic victims of "black crime," his position is without merit.

In 2002, whites, including Latinos, were about 81.5 percent of the population (3). That same year, whites (including Latinos) were 51 percent of the victims of violent crimes committed by blacks, meaning that whites were victimized by blacks less often than would have been expected by random chance, given the extent to which whites were available to be victimized (4).

As for the claim that blacks victimize whites at rates that are far higher than the reverse, though true, this statistic is meaningless, for a few obvious but overlooked reasons, first among them the simple truth that if whites are more available as potential victims, we would naturally expect black criminals to victimize whites more often than white criminals would victimize blacks.

Examining data from 2002, there were indeed 4.5 times more black-on-white violent crimes than the reverse (5). While this may seem to support Taylor's position, it actually destroys it, because the interracial crime gap, though seemingly large, is smaller than random chance would have predicted.

The critical factor ignored by Taylor is the extent to which whites and blacks encounter each other in the first place. Because of ongoing racial isolation and de facto segregation, the two group's members do not encounter one another at rates commensurate with their shares of the population: a fact that literally torpedoes the claims in The Color of Crime.

As sociologist Robert O'Brian has noted (using Census data), the odds of a given white person (or white criminal) encountering a black person are only about three percent. On the other hand, the odds of a given black person (or black criminal) encountering a white person are nineteen times greater, or fifty-seven percent (6), meaning the actual interracial victimization gap between black-on-white and white-on-black crime is smaller than one would expect.

In 2002, blacks committed a little more than 1.2 million violent crimes, while whites committed a little more than three million violent crimes (7). If each black criminal had a 57 percent chance of encountering (and thus potentially victimizing) a white person, this means that over the course of 2002, blacks should have been expected to victimize roughly 690,000 whites. But in truth, blacks victimized whites only 614,176 times that year (8).

Conversely, if each white criminal had only a three percent chance of encountering and thus victimizing a black person, this means that over the course of 2002, whites would have been expected to victimize roughly 93,000 blacks. But in truth, whites victimized blacks 135,931 times: almost 50 percent more often than would be expected by random chance (9).

Indeed, given relative crime rates as well as rates of interracial encounter, random chance would have predicted the ratio of black-on-white to white-on-black victimization at roughly 7.4 to one. Yet, as the data makes clear, there were only 4.5 times more black-on-white crimes than white-on-black crimes in 2002. In other words, given encounter ratios, black criminals victimize whites less often than could be expected, while white criminals victimize blacks more often than could be expected.

[Lies About Hate Crimes - More Fun With Nazi Math]

Taylor's claims regarding hate crimes are even more ridiculous.

The Color of Crime asserts that blacks commit a disproportionate share of racial and ethnic hate crimes against whites, while white-on-black hate crimes are far less frequent. But the data simply doesn't support such a claim.

From 1995-2000, blacks were 65 percent of racial and ethnic hate-crime victims, while whites were 21 percent of such victims (10). Adjusted for population, any given black person was nearly twenty times more likely to be the victim of a racially motivated hate crime than any given white. In 2001, there were approximately 4.6 times more white-on-black than black-on-white hate crimes (11), despite the fact that whites were between six and seven times more available in the population to become victims.

Considering that blacks are much more likely to encounter whites than vice-versa, this last statistic is especially alarming. After all, if blacks are nineteen times more likely to encounter whites than whites are to encounter blacks, any given black person would have nineteen times more opportunities to commit an anti-white hate crime than a white person would have to commit an anti-black hate crime.

Since blacks are roughly one-sixth the size of the non-Hispanic white population, in order to determine the expected ratio of black-on-white hate crimes relative to white-on-black hate crimes given random chance, one must multiply the 19:1 black-on-white encounter ratio by one-sixth.

Once this computation is made, we find that differential rates of encounter and population availability would predict that if levels of racial hatred were equal between whites and blacks, and the willingness to commit a hate crime were equal between the two groups, in any given year there should be 3.15 times more black-on-white hate crimes than white-on-black hate crimes.

That in truth there are nearly five times more white-on-black hate crimes than the reverse suggests that blacks are much less likely to commit an anti-white hate crime than would be expected and whites are far more likely to commit an anti-black hate crime than would be expected.

[White Fear of Blacks - The Height of Irrationality]

Of course, above and beyond the mere statistical chicanery at the heart of Taylor's report, the larger point is that for Taylor and other racists to claim that black-on-white crime data justifies white fear of African Americans, or racial profiling by police is sheer ignorance.

Criminologists estimate that seventy percent of all crimes are committed by just seven percent of the offenders (12): a small bunch of repeat offenders who commit the vast majority of crimes. Since blacks committed roughly 1.2 million violent crimes in 2002, if seventy percent of these were committed by seven percent of the black offenders, this would mean that at most there were perhaps 390,000 individual black offenders that year (13). In a population of 29.3 million over the age of twelve, this would represent no more than 1.3 percent of the black population that committed a violent crime in 2002.

Since fewer than half of these would have chosen a non-Hispanic white victim (as noted previously), this means that less no more than seven-tenths of one percent of the black population would have victimized a white person in 2002: hardly the kind of fact that would warrant white fear of blacks as a group.

Furthermore, since whites were victimized 2.9 million times by other whites in 2002 (compared to roughly 614,000 times by blacks), this means that whites are 4.7 times more likely to be victimized by another white person than by a black person (14).

Thus, if crime data can justify white fear of blacks, it would also require whites to be terrified of white neighbors, co-workers, family and white strangers, for these are the folks most likely to victimize us.

[The Absurdity of Profiling]

As for profiling, Taylor insists that because of higher black crime rates, it only makes good sense to focus police efforts on the black community. But this is demonstrably ludicrous. If, as the Justice Department data suggests, blacks commit somewhere between 25-30

percent of violent crime in most years (23 percent in 2002), to profile blacks for crime will result in police being wrong, between 70-75 percent of the time (15).

And of course, profiling is not the typical method for uncovering serious already-committed crimes anyway, since solving such crimes logically involves using incident-specific information. Profiling is, instead, too often done as a way to uncover crimes, such as drug possession, that have yet to come to police attention.

As for drugs, there can be no doubt that profiling is irrational. According to federal data, blacks are only 13.5 percent of drug users, while non-Hispanic whites are over 70 percent of users (16). So to profile blacks for drugs is to guarantee little success in actually uncovering drug crimes.

[Conclusion - Why Bother Responding to Nazis?]

Some may wonder whether it makes sense to spend so much time and energy responding to the claims of someone who openly consorts with neo-Nazis, and whose agenda is so blatantly racist in nature. Though it would be nice not to have to respond to such silliness, the fact is, Taylor and his report have been cited approvingly by conservative columnists and talking heads, from Walter Williams, to David Horowitz, to the folks at the National Review, to Vanderbilt Law professor, Carol Swain.

What's more, with studies suggesting that white perceptions of black criminality play a prominent role in furthering racism, both attitudinally and institutionally (in terms of support for racially disparate and draconian crime policies), refuting this kind of foolishness carries with it important personal and policy implications as well.

However unappealing it may be to have to answer the racist claims of bigots and fascists, the fact remains that given the appeal of racist logic to so many, and given the strength of institutional racism as a defining force in American life, we can hardly afford the luxury of ignoring such positions, so as to "not give them legitimacy."

The sad fact is that racism already enjoys plenty of legitimacy, with or without a rebuttal. Ignoring this reality isn't likely to diminish its strength, but responding to it forcefully might, at the very least, dissuade impressionable minds from accepting the twisted logic offered by the racist right. _____ Tim Wise is an antiracist essayist, activist and father. My earth science teacher told us that water is the only compound that
expands both when it is heated and when it freezes. Perhaps the expansion
when freezing is because of the crystalline structure it takes on as it
freezes?

That guy on c to c the other night was saying something about melting ice caps and warm water expanding and that will cause the Sea level to rise and all that kind of blah blah blah.Huh!,,, Some parts of the World's land area are still slowly, gradually rising upward from the last ice age.All that heavy ice exerts a tremendous downward force on the land.When the ice melts,the land under the ice rises up.Warm water (y'alls expanding water) rises up into the atmosphere and turns into clouds and rain and sleet and snow and hail.We are in absolutely no danger of drowning if the ice caps melt.So,let them melt.There is oil and minerals under the ice caps and people can go further North and live and farm and build cities and towns,,, untill the land gets covered over with more ice caps.Just Pray the the average air temperture doesn't rise to 140 degrees or above and stays there long enough.Result,,,, we can all kiss all of the Worlds water Bye Bye.

Gegroet,

I know this isn't shortwave, so if somebody knows a better NG for this, do let me know.

My question:
Does anybody know what is the future of the maritime band (430 to 505 Khz) in Region 1?

AFAIK, it is very little used anymore. I know the US plans to put DGPS beacons in there and in some countries (like the US and Australia) a part of the band (IIRC 490 to 505 Khz) has now been assigned to HAMs on experimental basis.

So, what are the plans for this band here in Europe?

Cheerio! Kr. Bonne.

4912. 660 kHz hum? Cubans?

Newsgroup: rec.radio.shortwave
Date: 2006-02-28 10:10:15 UTC

WFAN 660 (NYC) early in the morning, listening in Ohio, has a pretty
loud AC hum along with it, except I can put an antenna null on it
and take the hum out without taking out WFAN.

Which suggests some (probably Cuban) other station is putting out
a hefty AC hum. I don't hear the other station audio otherwise, however.

This started Monday morning, and is still there today Tuesday.

Who does he think he is kidding????

I have one of those here and I *KNOW* it isn't worth the 2 Grand he states!
I purchased mine 10 years ago for $80.00 at a hamfest and have been slowly
restoring it ever since (down to the last 15 or so parts and some tuning
left to do). I'd be lucky if I even got the money I put into it back out
again.

Hmm, lets see...what is wrong with this auction. Could it be that you are bidding on nothing more than 10 minutes of talk time via the internet. Or could it be that the auction proceeds are purported to go to some nonprofit but who knows where they will go. Or could it be a question about a seller with no feedback and lots of bidding activity by 2 sellers with no feedback. My, my.

>From time to time, Amazon and J&R Music World offer them on sale for about $129.00. Keep checking their sites.

I bought two more of them (giving me a total of five) from Amazon this past December for $129.15 each with free shipping.

While not "perfect" (what radio is?), it's definitely the best overall small portable SW receiver available right now. It would be ideal for a child as she will never outgrow it.

Best,

Joe

4930. OT Zogby Poll: Iraq Fighting Forces

Newsgroup: rec.radio.shortwave
Date: 2006-02-28 15:12:36 UTC
From: David <rickets@knac.com>
Message-ID: <qup802dfbdor3lb4edjgr1dckve3n3eia5@4ax.com>
Source record: 65330

The poll, conducted in conjunction with Le Moyne Collegeï¿½s Center for Peace and Global Studies, showed that 29% of the respondents, serving in various branches of the armed forces, said the U.S. should leave Iraq ï¿½immediately,ï¿½ while another 22% said they should leave in the next six months. Another 21% said troops should be out between six and 12 months, while 23% said they should stay ï¿½as long as they are needed.ï¿½

Different branches had quite different sentiments on the question, the poll shows. While 89% of reserves and 82% of those in the National Guard said the U.S. should leave Iraq within a year, 58% of Marines think so. Seven in ten of those in the regular Army thought the U.S. should leave Iraq in the next year. Moreover, about three-quarters of those in National Guard and Reserve units favor withdrawal within six months, just 15% of Marines felt that way. About half of those in the regular Army favored withdrawal from Iraq in the next six months.

The troops have drawn different conclusions about fellow citizens back home. Asked why they think some Americans favor rapid U.S. troop withdrawal from Iraq, 37% of troops serving there said those Americans are unpatriotic, while 20% believe people back home donï¿½t believe a continued occupation will work. Another 16% said they believe those favoring a quick withdrawal do so because they oppose the use of the military in a pre-emptive war, while 15% said they do not believe those Americans understand the need for the U.S. troops in Iraq.

The wide-ranging poll also shows that 58% of those serving in country say the U.S. mission in Iraq is clear in their minds, while 42% said it is either somewhat or very unclear to them, that they have no understanding of it at all, or are unsure. While 85% said the U.S. mission is mainly ï¿½to retaliate for Saddamï¿½s role in the 9-11 attacks,ï¿½ 77% said they also believe the main or a major reason for the war was ï¿½to stop Saddam from protecting al Qaeda in Iraq.ï¿½

You can add the audio outputs and reduce the internal noise
on a weak station. On the other hand, you increase the frequency
of losing sync lock on a weak station, so it may not pay.

Curiously, the audio phase is reversed in the 7600G (no R) so you can't
add one of those in the mix usefully.

A better approach costwise is buy a better synch detector'd receiver,
like the old 2010, for weak stations, of course.

I'd add the R8B but I don't know that it's better costwise than
14 7600GR's by experience.

Editorial Reviews

From the Inside Flap
Though millions recognize Dennis Weaver for his roles in the
long-running television series "Gunsmoke" and "McCloud" and, more
recently, as the host of the Western Channel, the most important work
of his life has not been performed in front of a camera. Since the
early 1980s, he has dedicated himself to serving humanity and the
environment. Now, Weaver shares the story of his life--his childhood
and military years, his career as an entertainer (which includes a
fascinating behind-the-scenes look at Hollywood), and his more recent
success as a spokesperson and role model for social annd environmental
concerns. His ultimate goal: to remind us that only through collective
spiritual growth and understanding the interrelationship of all living
systems, will humanity consciously step forward to preserve our world
for future generations.

About the Author
Dennis Weaver won an Emmy award for his role in television's longest
running series, "Gunsmoke". Over the past five decades, he has
appeared in stage, television, and motion picture productions as
actor, comedian, and singer/songwriter. Weaver co-founded Love is
Feeding Everyone (L.I.F.E.) and founded the Institute of Ecolonomics
to find solutions for a sustainable ecology and economy. He is a
sought-after speaker on social and environmental issues. Weaver lives
in a self-designed "Earthship." A film on this environmentally
friendly home has been featureed on PBS nationwide and at internation
and U.S. environmental film festivals.

That's a ripper bar. I lived in an agricultural area that was built on
a dry lake bed. Big tractors would pull those through the
concrete-like dry sediment to bust it up.

The ditch witches work pretty well. The guy I hired to dig the trench
for my coax had 300 feet done in one morning.

It is for Sure,whomever is doing the digging/trenching to first
determine that there isn't anything underneath the ground that shouldn't
be torn up.There is special equipment that I believe some trenching
companies use to make sure there aren't any cables/pipes/wires under
there.I own one of those devices that I once bought at a Goodwill
store.I doubt if it works though.

I doubt it.

It is really tough for a Cuban to just hum. Usually, after a few bars, they
break into song, and tap the rhythm with their fingers or hands.

Get a step lawn edger (blade with a handle, you step on it and
cut a slot in the grass ; handle lets you stand up while doing this)

Spread the slot with your fingers and run the coax in, press shut
and stamp down.

Works best when the grass is wet.

It disturbs the lawn very little. You can hardly see it.

To find coax years later, tune a portable AM radio to a moderate-weak
station, lay on ground and turn the radio for a null on the station.

Drag the radio across the place the coax is likely to be. When
you're over it, the station pops up out of the null.

I've found connectors on 200' runs to within a couple inches with this
method, years later.

And that, of course, is EXACTLY THE SAME as deciding that you are the
Master Race and waging war on the entire world, killing millions upon
millions of innocent people, in an insane attempt at world domination.

Yup. Ice Cube being pissed off over a history of being enslaved,
lynched and otherwise disenfranchised by white people in a country
whose claim to fame is freedom, and Prussian Blue glorifying the Nazi's
quest for world subjugation are EXACTLY THE SAME.

I see your point, nutball.

I suppose it's a matter of semantics, but I don't see how radio can exist without radio waves. Neither Loomis nor Stubblefield were generating radio waves. Conduction, induction and capacitive coupling can be used for communication, but none of them are radio. Radio uses nothing developed by Loomis or Stubblefield. Today's radio is a direct decendant of Maxwell's electromagnetic theories and Hertz's experimental confirmation.

Jews think they're the chosen people and hold views of racial supremacy
worse than any white does these days. Ever read the talmud?

> and waging war on the entire world, killing millions upon
> millions of innocent people, in an insane attempt at world domination.

That's what jews are doing right now.

>
> Yup. Ice Cube being pissed off over a history of being enslaved,
> lynched

The vast majority of blacks that were lynched committed a crime. It's
like the niggers these days that say it's racism because a cop arrested
a nigger for committing a crime. Look at the spport niggers gave
Tookie. Look at the uproar from the black community every time there's
a police chase with a nigger criminal. Look at how the black community
says it's racial profiling every time a nigger is arrested, especially
when the nigger actually committed the crime.

Niggers will say it's racism when one of their own is punished for a
crime they're guilty of.

> and otherwise disenfranchised by white people in a country
> whose claim to fame is freedom, and Prussian Blue glorifying the Nazi's
> quest for world subjugation are EXACTLY THE SAME.

Nazis don't want world domination, you're confusing them with the jews.
Nazis want a white homeland, jews are the ones that want to own
everything.

The other person, and you, were talking about Ice Cube.

Jumping from one subject to another without a logical transition is a
sign of a disordered thought process.

Typical in conspiracy nuts.

>
>
>> and waging war on the entire world, killing millions upon

Oh yeah, I just had The Jewish Army march up my street and shoot up a
couple thousand.

Yes, I know, you have some convoluted thought process by which what
you just said, which doesn't make sense, does make sense to you. And
which involves many many discontinuous leaps (see above).

Please, don't bother. I have seen it thousands of times already.

Suffice to say, if you say something which doesn't make any sense, as you just have, and you don't say it in a way which clarifies it at the time, then you have succeeded in talking nonsense.

<snip ... blah blah blah ... the thing about nutbags is they just go on and on and on ... which is why they never really go away, and never really stop influencing people. Ultimately you have to be a nutbag yourself to spend as much time dismantling their delusions as they do building them>

>
> I suggest you take the matter up with Mr. Devoldere.

I believe him--*you* are the one that doesn't. Therefore, logic would
dictate that *you* take it up with him.

> Since this is a 'shortwave' oriented newsgroup and not an amateur one, perhaps
> you'll share your SWBC listening/dx'ing experiences and loggings with us.

1) Again, I did not place the *original* post, just responded to and
supported *his* comments about interesting sunrise propagation during a
ham contest. I yet again suggest you take up your thinly veiled
complaint with the person who originally posted about the '180 meter'
amateur radio contest.

2) Last time I looked, amateur radio (at least HF) *IS* 'shortwave
oriented'.

3) As pointed out previously, whether it's 'one-way' or 'two-way', DX is
still DX.

4) Finally, I seem to recall *you* originating *numerous* posts
regarding the 3Y0X AMATEUR RADIO dx'pedition.

If I didn't know any better, it would seem that you are implying it's OK
for *you* to post topics with an amateur radio slant but that no one
else can, even if only in response to someone else's post. Seems a bit
hypocritical of you, don't you think? (just politely asking...)

> Looking forward to seeing your 'expert' input.

Well, your wires are a bit crossed--I said consistently that *Devoldere*
was the low band propagation expert, not me (*or* you). I never claimed
to be an expert on propagation or otherwise, unlike some 'aces' on this NG.

But they do care! They care a great deal. But the "they" I'm refering to aren't the great majority of the contributers to rrs. Most people who make worthwhile contributions do so a few times a week or less. A few real contributers might get busy and post a few times a day, but such contributions can't be maintained, simply because there's not that much new and interesting to say. Not all the time, that's for sure.

But there are a few trolls here, and determined cadre of autoresponders who are compelled to refute the trolls.

There's much to be gained by killfiling the trolls, and little to lose. Killfiling the autoresponders is more of a mixed bag because they sometimes do make a useful contribution.

I've found killfiling the trolls and the autoresponders worthwhile. They can be found on any of several of the nearly endless off topic threads. There's not many of 'em, far fewer than those who make a less active, yet more valuable contribution.

I've also killfiled a large group of crossposting trolls.

This brings up an interesting question. Do you have to dig below the local frost line for buried coax? If not, I think the edger would do the trick wit less mess. If you need to go deep, the Ditch-Witch could be my choice.

Don't think the Ditch-Witch is aim and shoot. As it encounters different densities of soil, it will want to move in the direction of least resistance. Your job is to point it straight. Your arms and shoulders will be sore after running one. Just try one on compacted fill.

Ron Hardin wrote:

You don't get that there is a difference betweeen referring to Ice Cube expressing hate speech, and replying with the phrase "deciding that you are the Master Race", do you? Let me answer that question for you, the answer is no, because you're a stupid motherfucker.

A ripper bar mounted on a heavy pickup truck will get a trench deep enough,I think.Put it in four wheel drive and mash that go pedal.A piece of two inch diameter steel bar with a steel plate welded to it and bore a hole in the plate (a cutting torch can cut out a hole) and mount it where the hitch ball mounts,jack up the rear wheels,let the bar dig into the ground,let the rear wheels back down on the ground,good to go.

I have for sale a beautiful Icom R75 with DSP and the following Kiwa mods:

Sync upgrade $45
Audio upgrade $35
Audio Filter upgrade $35
AM BCB attn full disable $25

I just got the rig back from Kiwa this week so they are the latest mods. The R75 is less than a year old. Serial # 0202691. I am the second owner. I am selling because I found a mint Drake R8 that I had been looking for when I bought the R75 :) I doubt you could tell it from new except it's missing two case screws.

It also has the incredible remote system seen here:
http://www.swl-remotes.com/pages/13/

I will ship all of this for $595 UPS ground, insured and double boxed. That's about the price of a new R75 alone. US Postal money order only. If you want to pick it up bring $550 cash. I'm just west of Indy. Please reply to:

Yes, since I'm from earth. On earth it makes much more sense than any paragraph that contains the phrase "You genuinely don't get that there is a difference between referring to Ice Cube expressing hate speech, and referring to Jews thinking they are the chosen people and so on?", and what's more, it is easily understable by anyone who isn't a stupid motherfucker.

On the other hand, the phrase "You genuinely don't get that there is a difference between referring to Ice Cube expressing hate speech, and referring to Jews thinking they are the chosen people and so on?", as well as deciding that saying something that stupid was a good idea in the context of this thread, only makes sense in the deluded, low-IQ minds of stupid motherfuckers such as yourself.

you and the other person were talking about Ice Cube's "hate speech"
as being comparable to Naziism. The other person pointed out reasons
Ice Cube is not comparable to Naziism. You then talked about Jews
thinking they are the chosen people and said "that is too comparable
to Naziism". I know you are having a hard time seeing that those are
not the same thing.

Your attempt to explain why something which made no sense made sense
was:

>You don't get that there is a difference betweeen referring to Ice Cube
>expressing hate speech, and replying with the phrase "deciding that you
>are the Master Race", do you?

Which was a masterpiece of confused meaninglessness.

yeah. And if he digs DEEP enough it not only is exciting, but expensive:
especially if he dif not do a locate to find underground utilities :) I used
to process such requests in a call center.

You're right. I gave in & started a killfile; it's already grown healthily!
I expect I will only see the relevant, on-topic posts now!
